### 5. Fire Fighting Measures

- Extinguishing Media** : Non-combustible liquid. Use extinguishing media suitable for underlying cause of fire.
- Specific Hazards Arising from the Chemical** : May produce phosphorus oxides and other toxic fumes under fire conditions.
- Special Fire Fight Proc** : Wear self-contained breathing apparatus and full protective clothing. Use water spray to keep fire-exposed containers cool.

### 6. Accidental Release Measures

- Personal Precautions** : Keep unprotected and unnecessary personnel out of spill area.
- Protective Equipment** : Splashproof goggles or face shield, impervious gloves, impervious apron and footwear. Respiratory protection not normally needed. Eyewash and emergency shower should be available in work area.
- Emergency Procedures** : Contain spill to prevent spreading to soil, waterways, drains or sewers.
- Methods and Materials for Containment and Cleanup** : If uncontaminated, recover and reuse product. If contaminated, carefully add lime or sodium carbonate to neutralize product. Then, cover with inert absorbent, shovel or scoop up and place in suitable containers for proper disposal.

### 7. Handling and Storage

- Precautions for Safe Handling** : Keep locked up and out of reach of children. Do not contaminate water, food or feed by storage, handling or disposal. Keep container tightly closed. Do not allow water to be introduced into the contents of the container.
- Conditions for Safe Storage** : Store in original container only. Do not store near heat or open flame. Do not store with oxidizing agents or ammonium nitrate.

### 8. Exposure Controls / Personal Protection

- TLV/PEL** : Phosphoric acid - 1 mg/m<sup>3</sup> (PEL), 3 mg/m<sup>3</sup> (TLV). Zinc Sulfate - no TLV or PEL established.
- Appropriate Engineering Controls** : Local exhaust should be sufficient.
