Ingestion:	Call a poison control center or doctor immediately for treatment advice. Have the person rinse mouth with water. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
Eyes:	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lens, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
Skin:	Remove contaminated clothing. Rinse skin with plenty of soap and water for 15-20 minutes. Call a doctor/physician if irritation occurs.

SECTION 5: FIRE FIGHTING MEASURES

Suitable Extinguishing Media: Dry chemical, foam or carbon dioxide (CO₂)

Special Fire Fighting Procedures: Wear NIOSH/MSHA approved self-contained breathing apparatus and full bunker gear. Dike area to prevent runoff and contamination of water sources. Water may be ineffective in fire fighting. Dispose of fire control water later. Avoid breathing vapors; keep upwind to avoid hazardous vapors and decomposing product. Heat may build pressure and rupture closed containers, spreading fire and increasing the rise of injury. Use water spray/fog for cooling containers and firefighting. Notify proper authorities if liquid material enters the sewer or public waters.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions: Refer to Section 8 for personal protective equipment to be worn during containment and clean-up of a spill involving this product.

Environmental Precautions: Stop spill at source. Construct temporary dikes of dirt, sand or appropriate readily available material to prevent spreading of material. Close cap or valves and/or block or plug hole in leaking container and transfer to another container. Keep from entering storm sewers and ditches which lead to waterways, and if necessary, call the local fire or police department for immediate assistance.

Methods for Containment and Clean up: Spilled material is slippery. Neutralize spill with soda ash or lime. Absorb spilled liquid with polypads or other absorbent materials. Clean up with non-combustible absorbent (such as sand or soil). Shovel up and place all spill residue in suitable containers. Use detergent if needed. Dispose of at an appropriate waste disposal facility according to current applicable laws and regulations and product characteristics at time of disposal.

Other Information: Uncontrolled releases should be responded to by trained professionals using pre-planned procedures. Proper protective equipment should be used. In case of a spill, clear the affected area, protect people, and respond with trained personnel.

SECTION 7: HANDLING AND STORAGE

Handling: Follow all SDS / label precautions when using this product. Do not reuse the container.

Storage: Store in a cool, dry, well ventilated area.

Minimum Storage Temperature: Store above 32° F

Other Precautions: Consult Federal, State and local laws and regulations pertaining to storage.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines			
Component:	OSHA PEL	ACGIH TLV	NIOSH REL
Glycerol (mist)	TWA 15mg/m ³ (total) TWA 5mg/m ³ (resp)		
Respiratory Protection: Avoid high concentrations of vapor and/or mist. Use local exhaust if available or use NIOSH/MSHA approved organic vapor respirator, as necessary.			
Engineering Controls: Local Exhaust: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs or other specified exposure limits. Local exhaust ventilation is preferred. Facilities storing or utilizing this material should be equipped with an eyewash station, safety shower, and adequate ventilation.			
Skin Protection: Clean, body covering clothing and impervious gloves such as neoprene should be used. Avoid prolonged and unnecessary skin contact with product.			
Eye Protection: Wear OSHA standard chemical splash goggles or face mask; avoid eye contact at all times.
