Although this product is not considered a hazardous material, the following measures are generally recommended following human exposure to chemical products.

<b>Eye Contact:</b>	Check for and remove contact lenses. Flush immediately with copious amounts of water or normal saline (minimum of 15 minutes), holding eyelids apart to ensure complete irritation of the eye and eyelid tissue. Take exposed individual to a health care professional, preferably an ophthalmologist, for further evaluation.
<b>Skin Contact:</b>	Remove contaminated clothing, shoes and equipment. Wash exposed area with plenty of soap and water. Repeat washing. If redness or irritation occurs, seek medical attention. Wash contaminated clothing before reuse.
<b>Inhalation:</b>	No adverse effects anticipated. If necessary, remove victim to fresh air and loosen clothing. Get medical attention.
<b>Ingestion:</b>	ONLY induce vomiting at the instructions of a physician. If victim is conscious, rinse mouth and give water to drink. Never give anything by mouth to an unconscious person. Seek medical advice.
<b>Note to Physician:</b>	Attending physician should treat exposed patients symptomatically.

**SECTION 5 FIRE FIGHTING MEASURES**

<b>Flammable Limits:</b>	Not applicable.												
<b>Autoignition Temperature:</b>	Not determined												
<b>Extinguishing Media:</b>	Use any means suitable for extinguishing surrounding fire. Use water spray to cool fire-exposed containers, to dilute liquid, and control vapor.												
<b>Firefighting Procedures:</b>	General guidelines as this material won't burn without driving off water: Not considered to be a fire hazard. Evacuate area and fight fire from a safe distance. Fire fighters must wear MSHA/NIOSH approved positive pressure breathing apparatus (SCBA) with full face mask and full protective equipment.

**SECTION 6 ACCIDENTAL RELEASE MEASURES**

**Spill/Leak:** Wear appropriate personal protective equipment. Safely stop source of spill. Initially minimize area affected by the spill or leak. Block any potential routes to water systems (e.g., sewers, streams, lakes, etc.). Restrict non-essential personnel from area. Spill or leak residuals may have to be collected and disposed of. Clay, soil or commercially available absorbents may be used to recover any material that can not readily be recovered as pure product.

**Cleanup:** Determine if waste containing this product can be handled by available industrial effluent system or other on-site waste management unit. If off-site management is required, contact a company experienced in industrial waste management. This product is not specifically listed in 40 CFR 261 as a Resource Conservation and Recovery Act (RCRA) waste. However, spill or leak residuals may meet the criteria of a characteristic hazardous waste under RCRA. Check the characteristic of used, spill or leak material to be disposed of to verify RCRA exempt.

**SECTION 7 HANDLING AND STORAGE**

**Handling Procedures:** Keep containers closed when not in use. Do not transfer to unmarked containers. Empty containers retain product residue which may exhibit hazards of material, therefore do not pressurize, cut, glaze, weld, or use for any other purposes. Return totes to reclamation centers for proper cleaning and reuse. Wash thoroughly after handling.

**Storage Procedures:** This material is suitable for any general chemical storage areas. Isolate from incompatible materials such as strong oxidizing agents. Store in PVC, PE, stainless steel or bitumized tanks. Avoid contact with aluminum, copper, copper alloys and nickel.

**Additional Information:** Containers should not be opened until ready for use. It is recommended that products be retested if stored more than 2 years. Under ideal storage conditions, the shelf-life is almost indefinite.

**SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION**

**Applicable Exposure Limits:**

- OSHA PEL = 5 mg/m<sup>3</sup> (ceiling)
  - ACGIH TLV = 0.2 mg/m<sup>3</sup> (TWA)
  - NIOSH REL = 1 mg/m<sup>3</sup> (TWA) / 3 mg/m<sup>3</sup> (STEL)
  - IDLH = 500 mg/m<sup>3</sup>

**Versa EDTA Mn 6%****SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION (cont.)**

<b>Eye Protection:</b>	Eye protection is strongly recommended. If material is handled such that it could be splashed into the eyes, wear safety glasses with side shields or vented/splash proof goggles (ANSI Z87.1 or approved equivalent).
<b>Skin Protection:</b>	Wear impervious gloves such as neoprene or nitrile rubber to avoid skin sensitization and absorption.
<b>Respiratory Protection:</b>	Use of respiratory protection is generally not required. However, if use conditions generate vapor, mist or aerosol and adequate ventilation (e.g., outdoor or well-ventilated area) is not available, use a NIOSH-approved organic vapor respirator with mist and fume filters to reduce potential for inhalation exposure.
<b>Ventilation System:</b>	Special ventilation is usually not required under normal use conditions. If vapor or mist is generated when the material handled, adequate ventilation in accordance with good engineering practice must be provided to maintain concentrations below the specified exposure. Eyewash stations and showers should be available in areas where this material is used and stored.
<b>Other:</b>	Consumption of food and drink should be avoided in work areas where product is present. Always wash hands and face with soap and water before eating, drinking or smoking.
