GENERAL INFORMATION: ACIDI_pHACTANT acts to reduce the pH of pesticide spray solutions to a point where alkaline hydrolysis (degradation) of the pesticide will be minimized. ACIDI_pHACTANT also serves to increase the activity and effectiveness of insecticides, herbicides, fungicides and many other agricultural chemicals.

MIXING INSTRUCTIONS: SHAKE WELL. Combine the desired quantity of ACIDI_pHACTANT with the water prior to addition of the pesticides.

SUGGESTED RATES: Insecticides, Fungicides and Herbicides: Use 4 to 8 ounces per 100 gallons of spray solution.

NOTE: Use rates may vary depending on water hardness and pesticide used. Some pesticides have stated adjuvant use rates. In all cases, the pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume.

STORAGE AND DISPOSAL

STORAGE: Store in cool, dry place. Store in original container. Keep container tightly closed. Do not reuse empty container.

DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Dispose of contents/container on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org.
