# BlueAg™ SPRAY GRADE AMMONIUM SULFATE

## BlueAg™ SPRAY GRADE AMMONIUM SULFATE

BlueAg™ Ammonium Sulfate Adjuvant is a sprayable ammonium sulfate designed to enhance herbicide performance. BlueAg Ammonium Sulfate Adjuvant reduces antagonism in the spray tank and increases deposition of the herbicide resulting in improved uptake by the targeted weed species.

### DIRECTIONS FOR USE

Consult your local BlueAg representative or other agricultural specialist for specific crop recommendations. Always read and follow all label directions, mixing instructions, and precautionary statements of the herbicide being applied. BlueAg Ammonium Sulfate Adjuvant may be used with applications labeled for Agricultural, Industrial, Non-Cropland, and other uses when the herbicide label suggests, recommends, or requires the use of ammonium sulfate as an adjuvant to improve herbicide performance.

### DETERMINING USE RATES

The BlueAg use rate must be determined by the herbicide label adjuvant recommendations and guidelines. When the herbicide label recommends Ammonium Sulfate rate per 100 gals: Substitute BlueAg at the exact rate. For example: when 17 lbs. per 100 gals. or 2% v/v is suggested, use 17 lbs. BlueAg per 100 gallons. of spray solution. When herbicide labels suggest a particular rate of Ammonium Sulfate rate per acre, substitute the exact rate per acre using BlueAg.

BlueAg Mix amount per 100 gallons	10 GPA	12 GPA	15 GPA	50 GPA
2.0 lbs. per acre	20 lbs.	17 lbs.	13 lbs.	10 lbs.
2.5 lbs. per acre	25 lbs.	21 lbs.	17 lbs.	13 lbs.
3.0 lbs. per acre	30 lbs.	25 lbs.	20 lbs.	15 lbs.

### PREPARING SPRAY SOLUTION

THOROUGHLY CLEAN ALL SPRAY MIXING AND APPLICATION EQUIPMENT PRIOR TO AND FOLLOWING EACH USE. UNLESS DIRECTED OTHERWISE BY MIXING INSTRUCTIONS ON THE HERBICIDE LABEL, BLUEAG SHOULD BE MIXED AS FOLLOWS:

1. Fill solution tank one half full of water and begin agitation.
2. Add BlueAg to the solution and continue agitation until dissolved. If no mechanical agitation is available, it may be necessary to slurry mix BlueAg in water prior to adding to the tank.
3. Add remaining tank-mix products in the following order: dry flowables and water dissolvable granules, wettable powders, flowables, solution, and emulsifiable concentrates.
4. Additional adjuvants as required.
5. Continue filling while agitating until all added products are thoroughly mixed into spray solution.

### STORAGE AND DISPOSAL

Store product in the original package only. Store in a dry clean facility away from oxidizing agents. Completely empty contents of bag into spray application equipment. Dispose of empty bags in a sanitary landfill or by authorized incineration.

### NOTICE

*Old World Specialty Products, LLC. warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Old World Specialty Products, LLC.
