

BOOST↑10™

A metabolic booster for your crop to increase yields.

COMPONENTS

- 4-0-0 fertilizer ingredient derived from vegetal protein hydrolysate.
- Contains over 30 organic and amino acids.

BENEFITS FOR PRODUCERS

- Increases the plant's ability to uptake and assimilate nutrients from the soil.
- Improved early stand and vigor; better rhizobia colonization on legumes.
- Can be applied alone or mixed with popup/starter fertilizer, herbicides and fungicides.
- Bridges the gap between inorganic fertilizers and proteins the plant creates.
- Contains a unique blend of organic acids that supports photosynthetic activity and high-yielding genetics.
- Consistent efficacy and performance at low use rates – 10.0 fl. oz./acre.
- Tank mix compatible with N, P, K, micronutrients, fungicides, insecticides and herbicides.
- Improves plant metabolism, allowing it to adapt to environmental conditions leading to a stronger stand, seedling vigor and root development.
- Increased nutrient transport during peak demand.
- Increased nutrient uptake allows for the plant to better respond to abiotic stresses.

APPLICATION GUIDELINES:

- As seed treatment. It is stable alongside seed applied technologies.
- Application Rate: 10 fl. oz./acre.
 - With fertilizer or other in-furrow applications.
 - As foliar spray.
