

Brandt[®] Insect Bait

Attractant

Principal Functioning Agents:

| | |
|--|--------|
| Corn steep liquor | 99.7% |
| Constituents Ineffective as Spray Adjuvant | 0.3% |
| Total | 100.0% |

CA Reg No. 48813-50006-AA

DIRECTIONS FOR USE

BRANDT INSECT BAIT is a corn derived, proteinaceous liquid that enhances the effectiveness of agricultural insecticides. The protein bait acts as a food attractant and its success in an IPM program is based on the immature female fruit flies' need of a protein meal for developing mature eggs.

Read and follow the precautions, restrictions and recommendations on the labels of insecticides used with BRANDT INSECT BAIT. Use according to the most restrictive label directions for each product in any tank mix.

BRANDT INSECT BAIT may be used on agricultural, aquatic, forestry, turf and ornamental, industrial and non-cropland sites. NOT FOR AQUATIC USE IN WASHINGTON.

COMPATIBILITY: BRANDT INSECT BAIT is compatible with most insecticides. However, if the desired combination has not been previously used, a compatibility test is recommended. Using this product with copper compounds or shortly after an application of copper may reduce effectiveness.

MIXING: Shake well before using. Although this product may contain a small amount of suspended solids, they should not interfere with spray nozzle performance. Fill spray tank ½ full of water and begin agitation. Add pesticides as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Add BRANDT INSECT BAIT last and continue agitation until spray solution is completely mixed. Continuous agitation of finished spray is recommended. If spray solution has been allowed to stand, thoroughly agitate and remix before application.

RECOMMENDATIONS: Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

AIR OR GROUND: Use 2-8 pints per acre with sufficient water for thorough coverage. Due to the attractant mode of action, overall coverage of the plant canopy is unnecessary and a 'spot spraying technique' is adequate. Bait spraying is most effective in 'area' treatment programs. It is ideal for medium to large fields and orchards or where adjacent properties use the technique.

WARNING

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes serious eye irritation. Causes skin irritation. Wear protective eyewear, long sleeved shirt, long pants, shoes plus socks and chemical resistant gloves made of any waterproof material when mixing or handling concentrate. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

IF ON SKIN: Wash with plenty of water. If skin irritation occurs, get medical attention.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container away from children, animals, foods, feeds, seeds and incompatible materials. Handle in accordance with Precautionary Statements. In the event of spillage or leakage, soak up the material with absorbent clay, sand, sawdust or other absorbent material. Scrape up and dispose in accordance with Product Disposal.

PRODUCT DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
