Refer to the lot number found on this container for identification.

Directions for Use

Cationic™ can be used on any crop. It can be applied to the soil through irrigation or foliar applied, mixed with enough water to obtain thorough foliar coverage.

For fertilizer rates suitable to your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist/Certified Crop Advisor or contact Results Driven Technology, LLC., 3205A N. Commercial Ave. Pasco, WA 99301.

NOTICE

The statements made on this label are believed to be true and accurate, but because of conditions of use which are beyond our control, RESULTS DRIVEN TECHNOLOGY does not make, nor does it authorize any agent or representative to make any warranty, guarantee or representation, expressed or implied, concerning this material or the use thereof. Neither RESULTS DRIVEN TECHNOLOGY nor the seller shall be held responsible in any manner for any personal injury or property damage or loss resulting to material, not in accordance with the directions. The buyer assumes all risk and liability resulting from improper handling, storage or use and accepts and uses this material on these conditions.

USE RECOMMENDATIONS

In combination with soil-applied liquid fertilizers: Cationic™ is designed for use in combination with soil-applied liquid fertilizers including starters, foliars and pop-up fertilizers. The recommended rate is 1-2% of the total fertilizer solution or 1/2-1 gallons per acre, whichever is greater. In blends, Cationic™ should be added to the water before adding any fertilizers solutions. The mixing order should be water, Cationic™ and then fertilizers.

Application in irrigation water: Cationic™ can be applied with irrigation water in any irrigation system, alone or mixed with fertilizers. Apply 1/2 to 1 gal/ac. of Cationic™ in the most critical growth stages of any given crop.

Foliar applications: Apply 1-2 pt/ac of Cationic combined with foliar fertilizers or growth promoters during plant growth and development, and repeat as necessary during the growing season.

PRECAUTIONS

Harmful if swallowed. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush skin or eyes with water for at least 15 minutes.

Cationic™ is compatible with most insecticides, fungicides, herbicides and acid, neutral and alkaline fertilizers, so it can be used in combinations in foliar applications or fertigation programs. Cationic™ is not phytotoxic at the recommended rates. When using Cationic™ with other products, add Cationic™ to the water, before mixing in the other products.
