

CHB DrySol Humic

DRY SOLUBLE HUMIC ACID

CONTAINS NON-PLANT FOOD INGREDIENT

Humic Acids 100%

Derived from Leonardite

GENERAL INFORMATION

CHB DrySol Humic is a concentrated water soluble humic acid from naturally occurring Leonardite. For use as a soil amendment and aids in nutrient uptake.

DIRECTIONS FOR USE

CHB DrySol Humic can be applied to all crops including: **Vegetable crops, row crops, field crops, trees and vines.**

Proper timing, rate and placement of CHB DrySol Humic is important for desired results and dependnet on soil fertility levels and environmental conditions.

Consult your BioGro consultant for rates of CHB DrySol Humic.

MIXING DIRECTIONS

CHB DrySol Humic should be thoroughly mixed with water to produce liquid humic products. The resulting liquid is compatible with many liquid fertilizers and micronutrients. Addition of the solution made with CHB DrySol Humic should not be done without first completing a jar test. When mixing with water, fill container three quarters full, add CHB DrySol Humic slowly with good agitation or circulation of water, then add the remaining water. Ensure adequate agitation in all situations. A defoaming agent may be required.

DO NOT MIX CHB DrySol Humic with calcium nitrate, phosphoric acid, zinc sulfate or other solutions with a pH of less than 6.0.

CAUTION: When combined with aqua ammonia, vapor releases may result in pressure build-ups. For such mixtures, only us mixing and application equipment that are vented and/or have pressure relief valves.
