Guaranteed Analysis

Sulfur (S).....**5.0%**
Iron (Fe)**5.0%**

Derived from: Ferrous Sulfate

GENERAL INFORMATION

CHB Iron 5% is manufactured specifically as a liquid soil applied fertilizer to be used to prevent and correct iron deficiencies that may limit crop growth and yield. Iron is essential in the formation of chlorophyll and activation of enzymes primarily involved in processes of photosynthesis and respiration.

CHB Iron 5% is a part of the Bio-Gro, Inc. CHB line of primary (N, P & K), secondary (Ca & Mg) and micronutrients (Zn, Mn, Cu, B & Fe) manufactured specifically as a liquid fertilizer to help prevent and correct nutrient deficiencies that may limit crop growth and yields. CHB Iron 5% is a supplement to an adequate soil fertility program. We recommend that you consider proper placement and application timing.

When applying CHB Iron 5% on organically certified crops, soil deficiency must be first documented by testing.

DIRECTIONS FOR USE

Compatibility - CHB Iron 5% can be blended with various liquid fertilizers. Caution should be used when blending with phosphate fertilizers. Certain forms of phosphate are compatible with CHB Iron 5%. Always conduct a jar test if you are uncertain about compatibility or consult your Bio-Gro, Inc. dealer for more information.

Mixing - Shake, stir, or swirl contents before using.

Applications - CHB Iron 5% can be applied by ground equipment and through irrigation systems. Recommended soil applications include banding and broadcast. Recommended fertigation methods include water run, sprinkler and drip irrigation. When using high rates avoid direct contact with living plant material or ensure an adequate volume of water to dilute CHB Iron 5% on plant surface.

SUGGESTED APPLICATIONS

Optimum rate of application will vary between fields depending on soil and/or climatic conditions, stage of crop growth and size of plants. Application rates are best determined by results from soil/plant analysis. For this reason we recommend that you contact your qualified Bio-Gro, Inc. product representative or agronomist with soil/plant analysis for evaluation.

General Soil Applications for all crops:

Maintenance..... 1 - 2 qts./acre
Moderate Deficiency..... 2 - 4 qts./acre
Severe Deficiency 1 - 3 gal./acre

Fertigation

Apply the required amount of product in split applications one to two weeks apart throughout the growing season.

Foliar

CHB Iron 5% can be applied as a foliar application on all crops at a rate of 1-2 pints per acre during periods of rapid vegetative growth. Use adequate water to prevent tissue burn.

“Approved material under Washington State Department of Agriculture organic food program”
