

CHOICE[®] TRIO

WATER CONDITIONING AGENT

For Agricultural, Industrial, Turf and Ornamental Sprays

Principal Functioning Agents:

(Poly(oxy-1,2-ethanedilyl), alpha-(nonylphenyl)-omega-hydroxy phosphate), 2-hydroxy-1,2,3-propanetricarboxylic acid	55.7%
Constituents Ineffective as Spray Adjuvant	44.3%
TOTAL	100.0%

CA Reg. No. 34704-50092; WA Reg. No. 34704-15003

KEEP OUT OF REACH OF CHILDREN

WARNING

Hazard and Precautionary Statements: Harmful if inhaled. Causes mild skin irritation. Causes eye irritation. May cause an allergic skin reaction. Avoid breathing dust /fume/gas/mist/vapours/spray. Use only outdoors or in a well-ventilated area. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. **Environmental Precautions:** Prevent further leakage or spillage if safe to do so. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Personal Protective Equipment: Wear protective gloves/protective clothing/eye protection.

First Aid: If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. **If in eyes:** Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL 1-866-944-8565.

GENERAL: CHOICE[®] TRIO is a non-AMS water conditioner designed to be used with pesticides that are susceptible to the negative effects of hard water, which can affect weed control. Hard water and high pH can reduce the miscibility and/or solubility of certain pesticides. CHOICE TRIO performs via three modes of action: sequestering, chelating, and complexing. It is effective on ALL hard water cations, thus preventing deactivation of susceptible pesticides, which in turn results in consistent performance. CHOICE TRIO is formulated to replace AMS and can be used in applications that do not recommend AMS but require water conditioning.

CHOICE TRIO may be used on a wide variety of agricultural crops or industrial and non-crop sites, such as but not limited to; Aquatic (wetlands), Forestry (site preparation and release), Industrial (storage areas, plant sites, and other similar areas including governmental and private lands), Grasslands (including pastures, rangeland and fence rows), Rights-of-way (utility, railroad and roadsides), Turf (golf courses, parks, sod farms, and lawns), and Ornamentals (container, field, greenhouse or nursery) and other turf, ornamental and landscaping sites. CHOICE TRIO is formulated to be compatible with all glyphosate products.

Note: Not all pesticides benefit from water conditioners. Refer to the specific product labels for restrictions and cautionary statements when used in tank mixtures. For tank mix compatibility concerns, conduct a jar test of the proposed mixture to ensure compatibility of all components. Mix components in the same ratio as the proposed tank mix. Before treating a large area, test on a small area and observe prior to full-scale application.

DIRECTIONS FOR USE: Fill spray tank 1/2 full of water and begin agitation. Add desired rate of CHOICE TRIO to water before adding pesticide. Add pesticide, as directed by label, while maintaining agitation.

SUGGESTED USE RATE:

1.0 to 2.0 quarts per 100 gallons (1/3 to 2/3 fluid ounce per gallon)

Note: Not all species have been tested. Before treating a large area, test on a small area and observe prior to full-scale application. Higher mineral content in water will require the higher rates of CHOICE TRIO. CHOICE TRIO does not replace requirement for adding surfactant. If pesticide label requires the addition of a surfactant, add a Leci-Tech[®] adjuvant such as Compadre[®], LI 700[®], Liberate[®], Weather Gard Complete or Strike Force[®] at recommended rate. These Leci-Tech products will also provide drift reduction, droplet adhesion and spreading, and penetration.

STORAGE AND DISPOSAL

STORAGE: Store locked up. Store in a well-ventilated place. Store in cool, dry place. Store in original container. Keep tightly closed. Do not reuse empty container. **DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Dispose of contents/container on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrcycle.org.
