

ComCat O

CONTAINS NONPLANT FOOD INGREDIENTS:

Active Ingredients:

0.24%	Saponins
90.0%	Dextrose (microbe food)

Purpose:

ComCat O is a plant based amendment for soil and crops. Due to the surfactant activity of saponins, Com-Cat O may improve soil water penetration leading to enhanced root and plant growth. Dextrose provides food for microbes.

Directions for Use:

ComCat O can be applied through sprinkler or irrigation systems. ComCat O is compatible with most modern fertilizing materials.

Application dosage: 1 to 2 oz per acre. Dissolve ComCat O in water and dilute prior to use. Apply with irrigation 3-4 times during key growth periods.

Storage

Store the product in a dry cool location. Avoid excess moisture and heat.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Net Weight: 100 grams (3.53 oz)
