GENERAL INFORMATION

0.96 lbs./gal. of Nitrogen, out of 1.92 lbs./gal. of the total Nitrogen in this product, is controlled release.

Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by crops or other intended plants. CoRoN is a liquid fertilizer with the unique properties that fit turf, ornamental and horticultural feeding needs.

PRECAUTION: Use of the product in accordance with label directions is not expected to adversely affect normal vegetative and/or reproductive growth in most situations. However, various environmental and agronomic factors, such as crop stress associated with high temperatures and/or dry conditions, make it impossible to eliminate all risks associated with the use of the product.

In Virginia, this lawn/turf fertilizer contains phosphorous and is only for nonagricultural use on (i) turf during its first growing season, (ii) on turf areas being repaired or renovated, and (iii) on turf where a soil test performed within the last 3 years indicates a phosphorous deficiency.

GENERAL RECOMMENDATIONS

Shake or agitate prior to use.
