

Coverage®

PENETRANT • DRIFT CONTROL AGENT DEPOSITION AID • NONIONIC SURFACTANT

PRINCIPAL FUNCTIONING AGENTS:

Methylated seed oil, Ethoxylated sorbitan fatty acid ester, and Seed oil 100%

PRODUCT INFORMATION

Coverage® was developed to help optimize pesticide performance. The ability to quickly wet and spread across the leaf surface helps aid in maximizing coverage of the intended target. Use of this product in a typical spray application will provide increased wetting of the leaf tissue, better penetration throughout the plant canopy, and improved efficacy of the spray solution. When used in conjunction with proper spray equipment selections and recommended rates, Coverage will help minimize drift-able fines, providing superior pesticide performance on agricultural, forestry, industrial, and non-cropland sites. Not for aquatic use.

DIRECTIONS FOR USE

Read and follow the pesticide label for proper timing, rates, specific directions, and any special use precautions. Use this product in accordance with the instructions found on the pesticide label regarding adjuvants. In the absence of specific instructions, follow the recommendations below which are considered adequate for most uses.

RECOMMENDATIONS: Optimum use rates can be affected by conditions of application such as water hardness, application method, equipment, spray droplet size, spray nozzle selection, or condition or size of foliage. Therefore, carefully observe spray deposition and adjust adjuvant rate accordingly to ensure thorough coverage without excessive runoff.

For pesticides that permit use of an adjuvant at a higher rate, follow instructions on that pesticide label. However, do not add this product at a rate which exceeds 5% of the finished spray volume. Use caution at the higher use rates. When applying to a sensitive crop, first treat a small area to determine if there are any adverse effects to the crop.

Use	Ground	Aerial
Herbicides	1-2 quarts per 100 gallons of spray mixture	1% v/v concentration Use 4 fl oz per acre with 3 gallons of water or less

MIXING: Shake well before use. Fill spray tank 2/3 full of water and begin agitation. Add tank mix partners, starting with water conditioner, as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, and

(5) Emulsifiable concentrates. Continuous agitation of finished spray is recommended throughout the spray operation. If spray solution has been allowed to stand, thoroughly remix before application. For best results, apply within 24 hours after mixing.

COMPATIBILITY: Coverage is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

KEEP OUT OF REACH OF CHILDREN PRECAUTIONARY STATEMENTS

Based on currently available data, this product is not classified as a GHS hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. Refer to the Safety Data Sheet if first aid instructions are needed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Store in original container only and keep tightly sealed when not in use. Store away from incompatible materials. Do not allow this product to freeze.

Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) during mixing and loading and add rinsate to spray tank. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.agrecycling.org. Decontaminated containers may also be disposed of in a sanitary landfill in a manner allowed by local, state and federal laws and regulations.
