Call a poison control center or doctor for further treatment advice.

General Information:

Crocker's Fish Oil is a water soluble sticker/spreader, adjuvant for use with approved pesticides. Crocker's Fish Oil is made using pure fish oil from mixed species and 2% other constituents ineffective as spray adjuvants.

Directions For Use:

Crocker's Fish Oil may be used for forestry, right of way, industrial and non-agricultural uses. For agricultural uses, Crocker's Fish Oil may only be used in conjunction with blossom thinning agents and approved pesticides before fruitlets appear and after harvest. Not for use on food products. Not for aquatic use.

Recommended Use Rates:

Use two pints per 100 gallons as a buffering agent. The use rate may need to be adjusted, depending on the PH of the water. Use 2-4 pints per 100 gallons as a non-ionic surfactant. If the pesticide label recommends a higher rate of surfactant, then follow the pesticide label directions.

Environmental Hazards:

Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Storage And Disposal:

Store in original container only, out of direct sunlight. Best if kept in a temperature stable location above 50 degrees Fahrenheit, or color change may occur. Stir well before transferring between containers or adding to a solution. Do not contaminate water, food or feed by storage or disposal. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The agricultural Container Recycling Council (ACRC) operates the national recycling program. to contact your state and local ACRC recycler visit the ACRC web page at www.agrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.
