

CROP AID REACT

4-3-6-10

CROP AID REACT is a liquid foliar fertilizer solution formulated to enhance and promote healthy plants. It is formulated to supplement and maximize a standard fertilizer program.

Application Recommendations

CROP AID REACT liquid solution is applied directly onto plant foliage with conventional agriculture sprayers and can be aerial applied.

APPLICATION RATES

Apply at 2.47L/ha (1L/ac) one to two times per season.

Timing

Cereal Crops: 4-6 leaf stage and flag to early heading stage.

Pulses: 2-4 leaf stage and early flowering.

Canola: 2 leaf up to early bolting stage.

CAUTION

CROP AID REACT contains boron; excess application of boron may cause crop damage. Always follow label rates.

Guaranteed Minimum Analysis

Total Nitrogen	4%	Manganese EDTA	.09%	Molybdenum EDTA	.01%
Phosphorous (P ₂ O ₅)	3%	Boron	.03%	Zinc EDTA	.12%
Potassium	6%			Copper EDTA	.09%
Sulphur	10%				

Active ingredients derived from registered and exempt materials.
