## **A Plant Nutrient for Row Crops, Fruits, Vegetables, Field Crops, Turf & Ornamentals**

### **DESCRIPTION**

DYMAX is a liquid plant nutrient intended to support plant vigor and growth in row crops, fruit & vegetable crops, as well turf and ornamentals.

DYMAX is intended to supplement standard fertility programs and is a readily available source of nitrogen.

### **DIRECTIONS FOR USE**

DYMAX is suitable for tank mixing with most commonly applied liquid fertilizers, chelates and commonly used agrochemicals with the exception of mineral oils and products containing sulfur.

DYMAX may be applied with copper fungicides to olive, potato, tomato, Brassica vegetables, and wine grapes. A small-scale test should be performed on any other crops before applying DYMAX with copper products.

Do not apply DYMAX with copper products during flowering or high temperature extremes.

Begin applications at the start of vegetative growth and early flowering. This product can be mixed with herbicides (including glyphosate) and fungicides.

### **APPLICATION RATES**

**Row & Field Crops:** Apply 16-24 ounces/acre. Repeat applications as necessary.

**Fruit & Vegetable Crops:** Apply 24-32 ounces/acre. Repeat applications as necessary.

**Tree & Nut Crops:** Apply 32-64 ounces/acre. Repeat applications as necessary.

NOTE: Use the lower rate indicated for low volume spray applications (3-10 gallons spray volume/acre)
