GENERAL INFORMATION

FOLI-GRO® 434 is formulated primarily for foliar applications to prevent or correct nitrogen, sulfur, iron and zinc deficiencies in a wide range of agronomic and ornamental plants.

Application of **FOLI-GRO 434** is a means of obtaining a quick response to needed elements. Foliar applications of **FOLI-GRO 434** may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or to crops suffering from a weakened root system. Avoid foliar nutrient applications to crops during periods of moisture, salinity or heat stress. Applications of foliar nutrients to sensitive crops such as leafy vegetables or soft-skinned fruit during periods of excessive temperatures may cause cosmetic injury. **CAUTION: FOLI-GRO 434** should not be used during cloudy conditions or in times of excessive humidity.

FOLI-GRO 434 should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development, yield and quality.

DIRECTIONS FOR USE

FOLI-GRO 434 may be applied as a foliar spray by air or by ground. Maintain agitation to provide uniform distribution within the spray tank. Thorough and even spray coverage is essential for maximum nutrient uptake and crop safety. Always include a high quality wetting agent, such as R-11® or SYL-COAT™, at recommended rates.

Optimum rate of application will vary based on a variety of factors including degree of need or deficiency, growth stage, yield potential, environmental conditions, existing soil fertility levels, etc.
