#### GENERAL RECOMMENDATIONS

Gradual-N<sup>®</sup> 30-0-0 is most effective when plants are growing rapidly and least effective when dormant or suffering from stress. Do not apply when temperatures exceed 90°F or when plants are under stress conditions due to excessive heat or lack of moisture.

Compatibility: Gradual-N<sup>®</sup> 30-0-0 is formulated to mix with most commonly used insecticides and fungicides. Determine compatibility with other fertilizers and/or pesticides by use of jar test before tank mixing.

Gradual-N<sup>®</sup> 30-0-0 is designed for both soil and foliar application. Gradual-N<sup>®</sup> 30-0-0 contains urea nitrogen for immediate response as well as methylene urea, which is converted to a usable form of nitrogen over time.
