

INFLATE K™

0-0-24

GUARANTEED ANALYSIS

Soluble Potash (K₂O)..... 24.00%

Derived from Potassium Acetate.

F3445

GENERAL INFORMATION

INFLATE K™ is formulated for in-furrow, foliar or soil applications to prevent or correct potassium deficiencies in a wide range of plants. Application of this product is a means of obtaining a quick response to needed potassium. Applications may be particularly beneficial during periods of peak nutrient demand, for crops growing on soils having poor nutrient availability or to crops suffering from a weakened root system. This product should be used as part of a comprehensive plant nutrition program for optimizing soil/nutrient conditions for plant growth, development, yield and quality.

DIRECTIONS FOR USE

INFLATE K may be applied as a foliar spray by air or by ground, applied through irrigation such as drip or microsprinkler, or applied in-furrow. It is advised that this product be diluted with water at no less than 2 parts water to 1 part product for foliar applications. Maintain agitation to provide uniform distribution within the spray tank. Use of a high-quality adjuvant at recommended rates is usually advised for optimizing product performance.

Do not apply foliar sprays when plants are under excessive heat or moisture stress. Consult your local agronomist before making applications of foliar nutrients to leafy vegetables, soft-skinned fruit, or susceptible crop varieties during periods of excessive temperatures, which may cause cosmetic injury or necrosis. Applications to foliage within 30 days of harvest may result in staining of rind or skin of developing fruit. Rain or overhead irrigation following application may cause minor cosmetic leaf shot-holing on *Prunus* species.

Timing of treatments should be based on crop nutrient demand, prevailing environmental conditions, plant tissue analysis data or other information that indicates a need for fast-acting, supplemental potassium. Consult your local agronomist for rates specific to your crop and conditions.

Do not apply near water, storm drains, or drainage ditches, or to any impervious surface. Do not apply if heavy rain is expected. Apply this product only to the intended application site.

FOLIAR APPLICATIONS:

Row Crops: Apply 0.5-5 gallons per acre as needed.

Fruit and Nut Crops: Apply 1-5 gallons per acre as needed. Citrus applications should be diluted at 10 parts water to 1 part product.

Vine Crops: Apply 1-3 gallons per acre as needed.

SOIL APPLICATIONS: Apply 1-4 gallons per acre at planting.

COMPATIBILITY: This product is compatible with many co-applied nutrient sources as well as plant protection products. Always jar test new combinations for compatibility prior to field mixing.

PRECAUTIONARY STATEMENTS

KEEP OUT OF REACH OF CHILDREN

Based on currently available data, this product is not classified as a GHS hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. Refer to the Safety Data Sheet if first aid instructions are needed.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Store in original container only and keep tightly sealed when not in use. Store away from incompatible materials. Dispose of contents/container in accordance with federal, state and local regulations.
