## GENERAL INFORMATION

Kovar Exalt HSO is an adjuvant for use with pesticides calling for the use of a nonionic surfactant or crop oil concentrate. Kovar Exalt HSO is proven effective in increasing surface wetting of the leaf surface and the ability to aid in the penetration of the active ingredients through the leaf waxy cuticle.

Kovar Exalt HSO improves the effectiveness of many post emergent herbicides but care must be taken when applied to sensitive plants that are under abiotic stress conditions such as high humidity, drought or high temperatures.

Kovar Exalt HSO is a 60% methylated seed oil/40% surfactant blend formulated to be a consistent, stable emulsion. Kovar Exalt HSO delivers better performance at a lower use rate than many other traditional MSO products and is especially beneficial when multiple herbicides are being used together.

Kovar Exalt HSO is approved for use with many traired herbicide technologies. Always check with the herbicide manufacturers website for the most current approvals.

This product is not recommended for aquatic use.

## DIRECTIONS FOR USE

Kovar Exalt HSO is registered to be used at a rate of 4–32 oz. per acre. Higher rates may be necessary when the crop is under extreme stress conditions or high weed pressure. **Do not use this product at rates in excess of 5% of the finished spray volume.**

Review both the adjuvant and pesticide label before use. Recommendations and restrictions on the pesticide label take precedence over any recommendations presented on this label. Kovar Exalt HSO may be applied by ground, air or other spray equipment that is listed on the pesticide label.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Store away from incompatible materials.

**PRODUCT DISPOSAL:** Dispose of waste and residues in accordance with local authority requirements.

**CONTAINER HANDLING:** Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill or other procedures approved by state and local authorities. The ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at [www.acrcycle.org](http://www.acrcycle.org)
