GENERAL INFORMATION

Kovar Radiance MX represents a new class in multifunctional adjuvants. It's a non AMS water conditioner which alleviates problems of hard water effects on certain pesticide chemistries. Kovar Radiance MX also decreases the spray droplet water tension allowing for better leaf surface contact and combined with its humectant properties allows for more time for active ingredients to be absorbed into the leaf. The drift and deposition components ensure better on target spray application ensuring greater consistency in performance.

Under abiotic stress conditions or larger sized weeds, the use of an additional adjuvant is permissible.

DIRECTIONS FOR USE

Kovar Radiance MX is registered to be used at a rate of 64–128 oz. per 100 gallons of spray volume.

For use with dicamba treated herbicide technologies use 80 oz. per 100 gallons of spray volume. Always check with the herbicide manufacturers website for the most current approved tank mix options.

Do not use this product at rates in excess of 5% of the finished spray volume except when used as a diluent in dormant, basal, site preparation or other similar applications, per label instructions.

Shake contents of jug well before adding to the spray tank.

Add Kovar Radiance MX to spray tank that is half filled with water and start agitation. Add other tank mix products while continuing to fill the tank with water with constant agitation of the spray mixture. Maintain agitation throughout spray application until tank is empty.

Review both the adjuvant and pesticide label before use. Recommendations and restrictions on the pesticide label take precedence over any recommendations presented on this label. Kovar Radiance MX may be applied by ground, air or other spray equipment that is listed on the pesticide label.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PRODUCT STORAGE: Store away from incompatible materials.

PRODUCT DISPOSAL: Dispose of contents in accordance with local/regional/national/international regulations.

CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Recycling cleaned containers is the best option of container disposal. ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
