

Kristol®

WATER CONDITIONING AGENT • SURFACTANT

PRINCIPAL FUNCTIONING AGENTS:

Ammonium sulfate* and Alkyl polyglucoside... 43.26%
CONSTITUENTS INEFFECTIVE AS SPRAY

ADJUVANT: 56.74%
TOTAL:..... 100.00%

*Contains 3.4 pounds of ammonium sulfate per gallon.

PRODUCT INFORMATION

Kristol® should be used to improve the performance of post-emergent herbicides where a nitrogen solution and surfactant are required. Many post-emergent herbicides perform best when the spray mix contains a water conditioner and a quality surfactant. Kristol replaces the need for 28% nitrogen solution and nonionic surfactants. Not for aquatic use.

DIRECTIONS FOR USE

Read and follow the pesticide label for proper timing, rates, specific directions and any special use precautions. Use this product in accordance with the instructions found on the pesticide label regarding adjuvants. In the absence of specific instructions, follow the recommendations below which are considered adequate for most uses.

RECOMMENDATIONS: Optimum use rates can be affected by conditions of application such as water hardness, application method, equipment, spray droplet size, spray nozzle selection, or condition or size of foliage. Therefore, carefully observe spray deposition and adjust adjuvant rate accordingly to ensure thorough coverage without excessive runoff.

For pesticides that permit use of an adjuvant at a higher rate, follow instructions on that pesticide label. However, do not add this product at a rate which exceeds 5% of the finished spray volume. Use caution at the higher use rates. When applying to a sensitive crop, first treat a small area to determine if there are any adverse effects to the crop.

Note: If the pesticide manufacturer's label requires a certain volume-to-volume (v/v) percentage of surfactant, then include a nonionic surfactant as needed in addition to Kristol. The nonionic surfactant must contain at least 80% surfactant.

Use	Rate per 100 gallons of spray mixture
Herbicides	2-6 quarts

MIXING: Shake well before use. Fill spray tank 2/3 full of water and begin agitation. Add tank mix partners, starting with water conditioner, as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, and (5) Emulsifiable

concentrates. Continuous agitation of finished spray is recommended throughout the spray operation. If spray solution has been allowed to stand, thoroughly remix before application. For best results, apply within 24 hours after mixing.

COMPATIBILITY: Kristol is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

KEEP OUT OF REACH OF CHILDREN

WARNING: Causes serious eye irritation. Causes skin irritation. May cause respiratory irritation.

PRECAUTIONARY STATEMENTS

Wear eye/face protection and protective gloves. Avoid breathing spray mist or vapor. Use only outdoors in a well-ventilated area. Wash thoroughly after handling.

FIRST AID: Have the product container or label with you when calling a poison control center or doctor or going for treatment. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention. If on skin: Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. If skin irritation occurs, get medical attention. If inhaled: Move to fresh air and keep comfortable for breathing. Call a doctor if you feel unwell.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Store in original container only and keep tightly sealed when not in use. Store away from incompatible materials. Do not allow this product to freeze.

Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) during mixing and loading and add rinsate to spray tank. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.agrecycling.org. Decontaminated containers may also be disposed of in a sanitary landfill in a manner allowed by local, state and federal laws and regulations.
