### GENERAL INFORMATION

- 15% Slow Release Nitrogen Blend
- Professional LCO Spray Material

**LINK® 18-0-2** is a prescription-formulated foliar fertilizer powered by NDemand®, a polymer-based nitrogen. NDemand contains humectant properties that allow the spray to dry slowly for maximum foliar uptake. Soil-applied NDemand provides slow release nitrogen activity in the soil profile. **LINK 18-0-2** is a low salt index, low biuret foliar nutrient providing efficient plant uptake, rapid plant response and excellent plant safety. **LINK 18-0-2** is designed primarily for foliar applications to prevent or correct nutrient deficiencies in turf and a wide range of ornamental plants. **LINK 18-0-2** should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development and quality.

Application of **LINK 18-0-2** is a means of obtaining a quick response to needed plant nutrients and beneficial elements. Foliar applications of **LINK 18-0-2** may be particularly beneficial during periods of peak nutrient demand, for plants grown on soils having poor nutrient availability, for plants suffering from a weakened root system or for other plant stresses. LINK products are formulated specifically for the professional market including greenhouse, field and container-grown nursery, sports turf, golf, lawn care, and landscape managers.

### DIRECTIONS FOR USE

When applying **LINK 18-0-2**, maintain agitation to provide uniform distribution within spray tank. If a spreader is desired or recommended in the mix, use a high quality CPDA approved spreader, such as DENALI-EA™ or RAINIER-EA®, at recommended rates to improve spray coverage. Do not apply when plants are under excessive heat or moisture stress.
