GENERAL INFORMATION

LINK® FOURTIPLEX™ is a prescription-formulated foliar fertilizer providing efficient plant uptake, rapid plant response and excellent plant safety. Nutrients contained in LINK FOURTIPLEX are readily available when applied to plant foliage or directly to the soil. LINK FOURTIPLEX is designed primarily for foliar applications to prevent or correct nutrient deficiencies in turf and a wide range of ornamental plants.

LINK FOURTIPLEX should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development and quality. Application of LINK FOURTIPLEX is a means of obtaining a quick response to needed plant nutrients and beneficial elements. Foliar applications of LINK FOURTIPLEX may be particularly beneficial during periods of peak nutrient demand, for plants grown on soils having poor nutrient availability, for plants suffering from a weakened root system or for other plant stresses.

LINK products are formulated specifically for the professional market including greenhouse, field and container-grown nursery, sports turf, golf, lawn care, and landscape managers.

DIRECTIONS FOR USE

When applying LINK FOURTIPLEX, maintain agitation to provide uniform distribution within spray tank. If a spreader is desired or recommended in the mix, use a high quality CPDA approved spreader, such as DENALI-EA® or RAINIER-EA®, at recommended rates to improve spray coverage. Do not apply when plants are under excessive heat or moisture stress.
