LINK® QUALITY™ is a prescription-formulated foliar fertilizer providing efficient plant uptake, rapid plant response and excellent plant safety. Nutrients contained in **LINK QUALITY** are readily available when applied to plant foliage or directly to the soil. **LINK QUALITY** is designed primarily for foliar applications to prevent or correct potassium deficiencies in turf and a wide range of ornamental plants. **LINK QUALITY** should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development and quality. Application of **LINK QUALITY** is a means of obtaining a quick response to needed plant nutrients and beneficial elements. Foliar applications of **LINK QUALITY** may be particularly beneficial during periods of peak nutrient demand, for plants grown on soils having poor nutrient availability, for plants suffering from a weakened root system or for other plant stresses. **LINK** products are formulated specifically for the professional market including greenhouse, field and container-grown nursery, sports turf, golf, lawn care, and landscape managers.

DIRECTIONS FOR USE

When applying **LINK QUALITY**, maintain agitation to provide uniform distribution within spray tank. If a spreader is desired or recommended in the mix, use a high quality CPDA approved spreader, such as DENALI-EA™ or RAINIER-EA®, at recommended rates to improve spray coverage. Do not apply when plants are under excessive heat or moisture stress.
