

GUARANTEED ANALYSIS

Total Nitrogen (N)	17.00%
6.00% Urea Nitrogen	
11.00% Water Soluble Nitrogen*	
Iron (Fe)	2.50%
2.50% Chelated Iron	

DERIVED FROM: Urea, Triazone, Methylene Urea, and Iron EDTA.

*9.00% Slowly available nitrogen from triazone and methylene urea.

KEEP OUT OF REACH OF CHILDREN PRECAUTION

Do not ingest. Avoid contact with skin, eyes or clothing.
Avoid breathing dust, vapor or mist.

FIRST AID

In all cases, call a poison control center or doctor for further treatment advice.

IF SWALLOWED, call a poison control center or doctor immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person. **IF ON SKIN**, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. **IF INHALED**, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration. **IF IN EYES**, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.

**For chemical spills, leaks, fire or exposure,
call CHEMTREC: (800) 424-9300.**

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

Store in a safe manner. Store in original container only and keep tightly sealed when not in use. Dispose of unused product and empty containers in accordance with federal, state and local regulations.

GENERAL INFORMATION

NDemand[®] IRON is designed primarily for foliar applications to prevent or correct nitrogen and iron deficiencies in a wide range of agronomic and ornamental plants. Its use is suggested as a supplement to a regular, balanced fertilizer program to enhance yields and improve quality.

Application of **NDemand IRON** is a means of obtaining a quick response to needed nitrogen and iron. Foliar applications of **NDemand IRON** may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or to crops suffering from a weakened root system.

NDemand IRON should be used as part of a comprehensive Total Nutrition System[®] for optimizing plant growth, development, yield and quality.

DIRECTIONS FOR USE

NDemand IRON may be applied as a foliar spray by air, ground concentrate or dilute. Maintain agitation to provide uniform distribution within spray tank. Use of a high quality CPDA approved spreader, such as R-11[®], at recommended rates to improve spray cover is usually advised. Do not apply when plants are under excessive heat or moisture stress. Applications of foliar nutrients to leafy vegetables or soft-skinned fruit during periods of excessive temperatures may cause cosmetic injury. Applications of iron and other metals to fleshy fruit within 30 days of harvest may result in staining of rind or skin.

Timing of application should be based on crop nutrient demand, prevailing environmental conditions, plant tissue analysis data or other information that indicates the need for fast-acting supplemental iron or nitrogen.

FIELD AND ROW CROPS: Use 1-8 quarts by ground application with a minimum of 10 gallons of water per acre. Use 1-4 quarts by aerial application with a minimum of 5 gallons of water per acre. Repeat applications as needed.

VEGETABLE CROPS: Apply at 8-32 ounces per acre as needed. Local knowledge on safety of foliar sprays to certain leafy greens should be considered before making such applications.

CITRUS: Use at 1-4 quarts per acre as needed.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

DECIDUOUS FRUIT AND NUT CROPS (Excluding Apples and Pears): Apply 1-2 quarts per acre from bud swell to early bloom and 1-4 quarts per acre post-bloom to pre-harvest. Avoid applications to fleshy fruit within 30 days prior to harvest. Rates as high as 1-2 gallons per acre may be used post-harvest. Some leaf spotting may occur. **Note:** Foliar iron applications followed by rain or overhead sprinkler irrigation on certain *Prunus* species may result in leaf shot-holing.

APPLES AND PEARS: Not for use in-season on bearing orchards. For post-harvest use in bearing orchards up to 4 gallons per acre may be used. Some leaf spotting may occur. May be used in-season on non-bearing orchards at 1-4 quarts per acre.

GRAPES: Apply 1-4 quarts per acre as needed 10-14 days prior to bloom to help reduce shatter induced by iron deficiency. In-season rates of 1-4 quarts per acre are advised, as needed.

SPORTS TURF, INCLUDING GOLF COURSES AND ATHLETIC FACILITIES: Use at 0.5-1.0 ounce per 1,000 square feet as needed.

COMPATIBILITY

NDemand IRON is compatible with most co-applied nutrients as well as crop protection chemicals. Always jar test new combinations for compatibility prior to field mixing. Care should be taken when blending with highly acidic materials, such as TRI-FOL[®], so as to not reduce spray solution pH below 5.5-6.0.

SPECIAL CONSIDERATIONS: **NDemand IRON** has an alkaline pH and may raise spray solution pH. When tank mixed with materials sensitive to alkaline hydrolysis the use of a buffer or acidifier at recommended rates is advised. Add buffer or acidifier before adding **NDemand IRON**. Reducing pH below 5.5-6.0 may result in precipitation.

Conditions of Sale and Limitation of Warranty and Liability:

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using the product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of the product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of many different factors including, without limitation, manner of use or application, weather, combination with other products, or crop conditions. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Manufacturer and Seller harmless from any claims relating to such factors.

Seller warrants that this product conforms to the chemical description on the label. EXCEPT FOR THIS WARRANTY, THE PRODUCT IS FURNISHED "AS-IS," AND NEITHER SELLER NOR MANUFACTURER MAKES ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE SELECTION, PURCHASE OR USE OF THIS PRODUCT; SELLER AND MANUFACTURER SPECIFICALLY DISCLAIM ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Buyer and User accept all risks arising from any use of this product, including without limitation uses contrary to label instructions, under abnormal conditions, or under conditions not reasonably foreseeable to (or beyond the control of) Seller or Manufacturer.

To the extent permitted by law, neither Manufacturer nor Seller shall be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE BUYER OR USER, AND THE EXCLUSIVE LIABILITY OF MANUFACTURER AND SELLER, FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THIS PRODUCT, OR, AT THE ELECTION OF MANUFACTURER OR SELLER, THE REPLACEMENT OF THE PRODUCT.

These Conditions of Sale and Limitation of Warranty and Liability shall be interpreted in accordance with the laws of the State of California, excluding its conflicts of laws rules, and may not be amended by any oral or written agreement.
