## GENERAL INFORMATION

NO FOAM is a concentrate defoamer useful for controlling both entrained air and surface foam in agricultural sprays.

NO FOAM performs well with all agricultural chemicals and is especially effective with thickening agents used for agricultural sprays.

NO FOAM is especially effective in recirculating sprayers or other high agitation equipment.

NO FOAM is a 10% active silicone, approved for use as a spray adjuvant or in food processing under 40 CFR 180.960.

Not for aquatic use.

## DIRECTIONS FOR USE

To control foam in a premix before it forms, use at a rate of 1 ounce per 100 gallons of solution. If existing foam is present, a rate of 1-2 ounces per 100 gallons may be required. Rates of No Foam may vary with tank size, type of agitation, chemical being used, and type of water being used.

**Air Applications:** Add to premix tank as soon as possible during filling.

**Ground Applications:** Add to spray tank as soon as possible during filling.

**Backpack or Handheld Sprayers:** Use 1/16 to 1/8 teaspoon per gallon of spray solution.

**Shake Well Before Use.** Residue in bottom of container is normal.

## USE RESTRICTIONS

Not for aquatic use.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Store in original container only and keep sealed. Store in closed storage areas. Use caution when moving, opening, closing or pouring.

**PRODUCT DISPOSAL:** Dispose of contents in accordance with all government regulation. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of federal law. Wastes resulting from the use of this product should be disposed of onsite or at an approved waste disposal facility.

**CONTAINER HANDLING:** Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Recycling cleaned containers is the best option of container disposal. The ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org).
