Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

GENERAL INFORMATION

NO FOAM is designed to prevent or minimize foam in fertilizer and pesticide spray mixtures. It is especially effective in recirculating sprayers or other high agitation equipment. Use of this product reduces pesticide spillage and tank mix fill time by effectively preventing foam formation. It can also improve calibration and metering of the spray mixtures. NO FOAM may be applied to agricultural, forestry, industrial, turf and ornamental, and non-cropland sites. Not for aquatic use.

DIRECTIONS FOR USE

Read and follow the pesticide label for proper timing, rates, specific directions and any special use precautions. Use this product in accordance with the instructions found on the pesticide label regarding adjuvants. It may be applied by ground, aerial or any other spray equipment recommended by the pesticide label. In the absence of specific instructions, follow the recommendations below which are considered adequate for most uses. Test intended mixture for compatibility.

MIXING: Shake well before use. Fill spray tank 2/3 full of water and begin agitation, then add NO FOAM to the spray tank to prevent or minimize foaming. Add tank mix partners, starting with water conditioner, as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, and (5) Emulsifiable concentrates.

Continuous agitation of finished spray is recommended throughout the spray operation. If spray solution has been allowed to stand, thoroughly remix before application. For best results, apply within 24 hours after mixing.

RATE RECOMMENDATIONS: Optimum use rates can be affected by conditions of application such as temperature, viscosity, agitation and composition of the spray mixture. Observe spray mixture and adjust rate accordingly to ensure adequate defoaming.

Use	Rate per 100 gallons of spray mixture
Antifoam	1 fl oz
Defoam	1 – 6 fl oz
	Rate per 1 gallon of spray mixture
Backpack or Handheld Sprayers	1/8 – 1 teaspoon

COMPATIBILITY: NO FOAM is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Store in original container only and keep tightly sealed when not in use. Store away from incompatible materials. Do not allow this product to freeze.

Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) during mixing and loading and add rinsate to spray tank. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.agrecycling.org. Decontaminated containers may also be disposed of in a sanitary landfill in a manner allowed by local, state and federal laws and regulations.
