Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also call CHEMTREC at 1-800-424-9300 for emergency.

ENVIRONMENTAL HAZARDS

Do not contaminate water sources by cleaning of equipment or disposal of washwater.

USE INFORMATION

PEPTOIL is a superior blend of highly refined paraffinic oil and emulsifier-surfactant system. It is designed for use with a broad range of pesticides including herbicides, insecticides, fungicides and/or fertilizers and micronutrients. This product increases contact activity of the spray, enhances penetration and provides uniform coverage of the leaf surface. This product contains an antifoam to suppress foam development in tank-mix combinations.

DIRECTIONS FOR USE

Read and follow all information on the label of the pesticide, fertilizer or micronutrient with which this product is used.

Always refer to the pesticide and additive label(s) for additional recommendations or precautions. Follow the most restrictive label.

To prepare agricultural sprays containing this product, fill the spray tank half full with water, add the proper amount of pesticide, fertilizer or micronutrient as directed by its label and then add this product. Maintain agitation during the entire process. Continue agitation while filling the tank with water and agitate before and during each application to ensure a uniform spray.

Note: Care should be exercised when sprays containing this product are applied to new crop varieties or highly inbred crop lines not previously treated with this product. It is recommended that a small test area be treated before spraying large areas. Use care during periods when pesticides are more active, such as during periods of hot or humid conditions. Not for aquatic use.
