

PHASE[®] II

SURFACTANT — DEPOSITION AID ENHANCES COVERAGE IMPROVES CONTACT

Principal Functioning Agents:

Carbamides, Alcohol ethoxylates, Methylated esters of fatty acids, Polyether modified polysiloxane	80%
Constituents ineffective as Spray Adjuvants	20%
TOTAL	100%

KEEP OUT OF REACH OF CHILDREN

CAUTION

NET CONTENTS: 2.5 U.S. GALLONS (9.462 L)

CAUTION: Harmful if inhaled or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Remove and wash contaminated clothing before reuse. PERSONAL PROTECTIVE EQUIPMENT: Wear chemical-resistant gloves, long-sleeved shirt and long pants, shoes plus socks when mixing or applying PHASE[®] II.

First Aid: If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **If Swallowed:** Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL 1-866-944-8565.

GENERAL: PHASE II is a blend of carbamides, alcohol ethoxylates, methylated esters of fatty acids and organosilicone surfactant. The organosilicone surfactant enhances the spread of the water portion of a spray solution to yield a more uniform coverage. Methylated esters of fatty acids enhance coverage and contact with foliage of oil components.

DIRECTIONS FOR USE: PHASE II should be utilized with agricultural chemicals and biological controls to improve coverage, wetting and deposition of agricultural sprays. In aerial or ground equipment: Fill spray tank 1/2 full with water. Begin agitation, add selected agricultural chemicals in proper sequence. Eliminate any existing foam with approved defoamer (such as UNFOAMER[®]). To minimize foam, fill tank to desired water volume before adding PHASE II.

Suggested Use Rate: 4 quarts / 100 gallons or 1% by volume.

Some pesticides have stated adjuvant use rates, in all cases the pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate followed.

Environmental Hazards: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. (Not for aquatic use in Washington.)

STORAGE AND DISPOSAL

STORAGE: Store in cool, dry place. Store in original container. Keep container tightly closed. Do not reuse empty container.

DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes may be disposed of on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.
