

Modified Vegetable Oil and Surfactant Blend

# FASTSTRIKE®

## PRINCIPAL FUNCTIONING AGENTS:

Methylated vegetable oil, polyether modified polysiloxane, alkylphenol ethoxylate .....	99%
Constituents ineffective as spray adjuvants .....	1%
<b>TOTAL</b> .....	<b>100%</b>

All ingredients are exempt from tolerance requirements under 40 CFR, 180.

CA Reg. No. 7001-50008 WA Reg. No. 7001-09005

## PRECAUTIONARY STATEMENTS:

Keep out of reach of children.

**Personal Protective Equipment:** Wear protective gloves / protective clothing / eye protection / face protection.

<b>FIRST AID:</b>
<b>IF INHALED</b> Assure fresh air breathing.
<b>IF ON SKIN</b> Wash all exposed skin area with mild soap and water, followed by warm water rinse.
<b>IF IN EYES</b> Rinse immediately with plenty of water. Obtain medical attention if pain, blinking or redness persist.
<b>IF SWALLOWED</b> Rinse mouth. Do NOT induce vomiting. Obtain medical attention if you feel unwell.

## ENVIRONMENTAL HAZARDS:

Do not contaminate water sources by cleaning of equipment or disposal of wash water.

## STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

**Storage:** Do not store near heat or open flame. Store in original container.

**Disposal:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org). Decontaminated containers may also be disposed of in a sanitary landfill.

P.O. Box 198, Lathrop, CA 95330

# FASTSTRIKE®

## GENERAL INFORMATION

FASTSTRIKE is a unique blend of highly refined and modified spray oil and nonionic organosilicone. FASTSTRIKE'S unique chemistry allows for enhanced wetting absorption of those pesticides or product which labels recommend the addition of a spray adjuvant to improve performance. The addition of FASTSTRIKE to a spray tank solution will improve a spray application by physically modifying the wetting and spreading characteristics. The result is a more uniform spray deposit. Observe the initial application to insure thorough coverage without excessive runoff of the spray.

## DIRECTIONS FOR USE

FASTSTRIKE is intended for use with pesticides that are labeled for agricultural and non-agricultural uses. **Not for aquatic use.**

The use of FASTSTRIKE can increase pesticidal activity where the following factors occur, but is not limited to: (1) Low humidity and high temperatures; (2) Low water volume rates of less than 15 gallons per acre; (3) When target species are larger than the label recommendations at time of application.

## MIXING

Prior to pesticide application, clean mixing and application equipment according to pesticide label directions. To minimize foaming fill spray tank 2/3 or 3/4 full of water and begin agitation. If foaming is anticipated the addition of an antifoaming agent should be added before pesticides, nutrients, or FASTSTRIKE. Add pesticides and/or fertilizers as directed by label or in the following sequence: A. Micronutrients and fertilizers, B. Dry flowables and dispersible granules, C. Flowables, D. Water soluble pesticides, E. Emulsifiable concentrates. Continue agitation and add FASTSTRIKE, when completed, reduce agitation and allow to mix for 1 to 2 minutes. While under minimal agitation, continue filling tank and allow to mix for 10-15 minutes prior to application.

NOTE: For optimum results, spray mixes containing FASTSTRIKE should be applied within 36 hours.

## RECOMMENDED RATES

<u>APPLICATION</u>	<u>RATE PER 100 GALLONS</u>
Aerial:	6 - 16 pints
Ground:	3 - 5 pints

**NOTE:** The application rates on this label are based on pesticide labels which recommend the use of a nonionic surfactant. Rates of this product may be increased or decreased for optimum results, follow pesticide labeling for proper recommendations. Before using FASTSTRIKE where a nonionic surfactant may not be recommended the user or applicator advisor must have experience with the combination or must have conducted a phytotoxicity trial.

**DISCLAIMER OF WARRANTIES:** J.R. Simplot Company warrants that the chemical composition of this product conforms to the chemical description and is reasonably fit for the purpose as stated on the label only when used in accordance with label directions under normal conditions of use. To the extent consistent with applicable law J.R. Simplot Company makes no other EXPRESS or, IMPLIED WARRANTIES either OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of J.R. Simplot Company and seller. To the extent consistent with applicable law risks such as crop injury, ineffectiveness of other unintended consequences resulting from, but not limited to, ether or soil conditions, presence of other materials, disease, pest, drift to other crops or property or failure to follow label directions will be assume by the Buyer or Use; To the extent consistent with applicable law, in no case will J.R. Simplot Company or Seller be held liable for consequential, special or indirect damages resulting from the handling, storage or use of this product.
