**GENERAL INFORMATION**

KICKER CA is a proprietary blend of liquid ammonium sulfate spray solution. The ammoniacal nitrogen in KICKER CA has been found to increase plant root system establishment. KICKER CA also reduces environmental stress on crops while improving the quality and production for a wide range of agricultural practices. KICKER CA's use of high-quality spray-grade ammonium sulfate eliminates cold water sedimentation and nozzle plugging commonly found with dry AMS. KICKER CA also contains a pH stable antifoam which prevents foaming during tank mixing.
