GENERAL INFORMATION

ProNatural® IRON PLUS is manufactured and designed for foliar applications on plants to prevent or correct iron deficiencies that may limit crop growth and yields. **ProNatural IRON PLUS** is readily available and rapidly absorbed by the plant because of the natural complexing properties. It is water soluble and non-toxic to plants when applied as directed. **ProNatural IRON PLUS** enhances plant growth and development by stimulating nutrient uptake, nutrient penetration and nutrient utilization.

ProNatural IRON PLUS is a proprietary formulation that has been specially reacted with emulsion polymerization that provides a wide range of mixing ease with other fertilizers or chemicals.

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING. KEEP FROM FREEZING.

Dilute 1 part **ProNatural IRON PLUS** with 20 or more parts water. Apply using a spray method and in an adequate amount of water that will provide complete coverage of the plants. Use of a nonionic wetting agent may improve spray coverage of certain hard-to-wet plants. **Do Not Apply Undiluted.** Mixing of **ProNatural IRON PLUS** with calcium chloride may cause russet.

ProNatural IRON PLUS can be included in a regular spray program on crops. Consult with a Wilbur-Ellis representative on compatibility with other spray materials. The rate of application will depend on the crop, stage of growth, and severity of deficiency. The maximum recommended rates are for mature, full-sized plants.
