GENERAL INFORMATION

PURIC® PRIME MAX humic acids solution may be applied to most crops and may enhance micronutrient uptake. This product is readily dispersed in most fertilizer or micronutrient products. It is a weak alkaline solution and may alter the pH of certain solutions.

DIRECTIONS FOR USE

FOLIAR: Use 1-3 quarts per acre with sufficient water for thorough coverage by air or ground application. This product is a weak alkaline salt and may be neutralized with a buffer.

SOIL: Apply 1 quart to 5 gallons or more per acre with fertilizer or with water. Higher rates or repeated applications at lower rates may be beneficial.

FERTIGATION: PURIC PRIME MAX may be water-run in open systems or injected into closed irrigation systems at rates of 1-5 or more gallons per acre. May be applied with other liquid fertilizers.

For specialized uses, please contact your local Wilbur-Ellis representative.

COMPATIBILITY: PURIC PRIME MAX is formulated for improved compatibility with liquid fertilizer solutions. Many fertilizers will mix spontaneously with this product. For some fertilizers, dilution with one volume of water per volume of PURIC PRIME MAX may be needed for ease of mixing. This product may require agitation when mixed with a concentrated phosphate fertilizer such as 10-34-0. Do not mix with acid fertilizers or with solutions having a pH less than 5.0. Proposed mixtures should be evaluated in a jar test before full-scale use. To reduce risk of incompatibility, follow this sequence of mixing:

1. Water
2. PURIC PRIME MAX
3. Fertilizer
