

QUICK CAL

FORMULATED AS AN AID FOR HELPING PREVENT CORK SPOT, BITTER PIT, AND OTHER CALCIUM DEFICIENCY DISORDERS IN FRUIT TREES, FIELD AND VEGETABLE CROPS.

GUARANTEED ANALYSIS

Calcium (Ca).....**12.0%**
12.0% Water Soluble Calcium (Ca)

Derived from: Calcium Chloride.

This product does not contain more than 23% Chloride (Cl).

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes eye irritation.

PRECAUTIONARY STATEMENTS

Wash hands thoroughly after handling. Apply the product with non-corrosive spray equipment containing parts made of stainless steel, P.V.C., plastic, or fiberglass. Store above 32°F. Do not contaminate feed or foodstuffs. Do not apply to any area not specified on label. Do not reuse empty container. Triple rinse (or equivalent) and offer for recycling or reconditioning, or dispose of in accordance with Federal, state and local laws and regulations.

FIRST AID

IF IN EYES: Rinse cautiously with water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical attention.

In case of medical emergency, call toll free 1-877-424-7452

FOR CHEMICAL SPILL, LEAK, FIRE OR EXPOSURE, CALL CHEMTREC: 1(800) 424-9300.

GENERAL INFORMATION

Quick Cal is most effective when plants are growing rapidly and least effective when dormant or suffering from stress. On plants with waxy leaf surfaces, use a nonionic wetting agent at recommended rates. Do not use while temperatures are exceeding 90°F or when plants are under stress conditions. Determine compatibility with other fertilizers and/or pesticides by use of a jar test before tank mixing.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

DIRECTIONS FOR USE:

Pour recommended amount of **Quick Cal** into partly filled spray tank. Add balance of water to fill tank. Keep agitated while filling and spraying. Flush all spray equipment after use.

AGRICULTURAL CROPS

Soil application recommendations: **Quick Cal** can be mixed and applied with compatible liquid fertilizers or water. Apply 1 to 2 gallons of **Quick Cal** per acre. Determine compatibility when mixing with other liquid fertilizers and/or pesticide before proceeding.

UNITED

Foliar spray recommendations: Because of the nature of calcium deficiencies, **Quick Cal** should be applied in multiple applications at 10-14 day intervals during the rapid growing and/or fruiting stage. For best results, spray when the crop is in an active growing state: after irrigation or natural rainfall. Spray early in the morning or late afternoon, Midday sprays may not be effective because of excessive moisture evaporation.

FIELD & VEGETABLE CROPS

Apply 2 to 4 quarts per acre in at least 25 gallons of water. Application should be made early in the growing season. This treatment should be repeated if crops continue to show deficiencies.

ORCHARD CROPS

Apply ½ to 1-1/2 gallons per acre in at least 100 gallons of water. Application can be made throughout the growing season and can be combined with cover sprays.

GRAPES

Apply 2 to 4 quarts per acre in 50 to 100 gallons of water beginning at the “soft-berry” state and repeat at 10 to 14 day intervals during the growing season.

DRIP IRRIGATION

The required amount of this product should be applied over the growing season of the crop via multiple applications 1-2 weeks apart.

Consult your State Agricultural Experiment Station, State Extension Service Specialist or Winfield Regional Plant Nutrition Specialist for complete details on the spraying program best suited to your local conditions.
