### GENERAL INFORMATION

QUICK ULTRA WITH AWAKEN<sup>®</sup> is formulated to contain polyphosphates for more efficient utilization of the phosphorous by the plant. Quick Ultra with Awaken is designed for use as a foliar spray over the row during early seeding growth stages to encourage strong root system development. It supplies the nutrients needed by young plants growing under cool, wet conditions. It can also be used as a "Pop-up" fertilizer when used with properly configured planters in covering soil or close to the seed. Quick Ultra with Awaken also contains an enriched package of micronutrients in highly available EDTA HEDTA form. Designed for foliar application, it supplies vital nutrients at or near the time they are needed most.

**DIRECTIONS FOR USE:** QUICK ULTRA WITH AWAKEN<sup>®</sup> will dispense in water with minimal agitation. It can be used with most pesticides. Always check compatibility before mixing. Follow the mixing sequence:

1. Water;
2. QUICK ULTRA WITH AWAKEN;
3. Pesticide, Minimum GPA-20 ground, 5 air;

QUICK ULTRA WITH AWAKEN is corrosive to aluminum, mild steel and brass. Store and /or ship in polypropylene, fiberglass or stainless steel containers. Use only stainless steel, or P.V.C. fittings.

### RECOMMENDED RATES

**Soil Application:** Apply 2.0 to 4.0 quarts per acre at planting as a "Pop-Up" fertilizer in properly configured planters, in covering soil or close to the seed.

**CROP SAFETY:** This product has been tested on a number of crop varieties with no phytotoxicity observed at labeled rates; however, this product has not been tested on all varieties and cultivars. Due to the large number of plant species and their associated varieties or cultivars, and due to variable growing conditions, it is impossible to test every plant for tolerance to this product. It is the responsibility of the user to determine if this product can be used safely prior to commercial use. In a small test area, test the specified rates on plants for phytotoxicity prior to general use. Before using any tank mix, test the combination on a small portion of the crop to be treated to ensure that a phytotoxic response will not occur as a result of application. Treat a small group of target crop including plant cultivars and evaluate for 3 to 7 days prior to making an application to your entire crop.

**TANK MIX COMPATIBILITY:** This product is compatible with many agricultural pesticides. However, if specific information is not available, a jar test for compatibility should be conducted prior to large scale mixing.

**If there is contact made with spray solution containing pesticides and/or spray adjuvants, follow the FIRST AID STATEMENT on the pesticide label.**
