

FOR AERIAL APPLICATIONS ONLY

RAYNOX® AIR Apple Sunburn Protectant is especially designed to protect apples from sunburn browning when aerial applications are made. Under comparable environmental conditions, apple varieties vary in susceptibility to sunburn browning. For example, Cameo apples are highly susceptible to sunburn while Pink Lady apples are very tolerant. Other varieties, including Golden Delicious, Fuji, Granny Smith, Gala, Jonagold, Red Delicious and Braeburn, are intermediate in susceptibility.

PRINCIPAL INGREDIENTS: Contains no ingredients of 1% or greater in its formulation. Proprietary formula with food grade ingredients.

List No. 10383

INDEX:

- 1.0 First Aid
- 2.0 Recommendations for Use
- 3.0 Storage and Disposal

WARNING

May cause an allergic skin reaction KEEP OUT OF REACH OF CHILDREN

This product is a mild skin sensitizer/irritant. Eye contact will cause minor irritation. Individuals sensitive to alkaline materials may develop dermatitis upon prolonged or repeated contact with product concentrate. Avoid breathing mists, vapours or spray if residuals are present at or above the TLV, respiratory protection must be worn. Wear protective gloves additional protective necessary clothing as contact with product. Contaminated clothing should not be allowed out of the workplace.

FIRST AID	
If in eyes	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Get medical attention if irritation persists.
If on skin	Take off contaminated clothing. Wash skin with plenty of soap and water. If skin still feels slippery, continue washing until slick feeling is gone. If redness, burning, or irritation persists get medical advice/attention.Wash contaminated clothing before reuse.
If swallowed	Give large quantities of water. DO NOT induce vomiting. If vomiting occurs administer additional fluids. Call a poison control centor or doctor for treatment advice. Do not give anything by mouth to an unconscious person.
If inhaled	Move person to fresh air. If person is not breathing call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth, if possible.
HOT LINE NUMBER	
CALL 800-892-0099 (24 HOURS) FOR EMERGENCY	

INFORMATION.

PRODUCT MAY SETTLE DURING EXTENDED STORAGE: AGITATE OR MIX THOROUGHLY BEFORE USE. DO NOT STORE AT TEMPERATURES BELOW 45°F OR IN DIRECT SUNLIGHT.

2.0 RECOMMENDATIONS FOR USE

TANK MIXES: DO NOT mix Raynox Air Apple Sunburn Protectant with fertilizers, pesticides or other agricultural chemicals.

Mixing:

1.0

- 1. Fill clean spray tank with ALL REQUIRED DILUTION WATER.
- 2. ALWAYS add sufficient Raynox Water Softener according to its label directions to treat the total required dilution water (Referred to as treated water). Mix thoroughly before adding Raynox Air. NOTE: You must know the level of hardness of your spray water supply. If your water hardness is over 180 ppm, contact your Valent Technical Representative to determine the proper amount of water softener to use. Insufficient or improper use of water softener can result in product degradation and may adversely affect product performance and fruit finish.
- 3. Continue mixing contents of tank as you slowly add 2.5 gallons of Raynox Air to treated water for each acre.

APPLICATIONS: Aerial Application ONLY (Helicopter or Fixed Wing Aircrafts): When applying Raynox Air by either helicopter or fixed wing aircrafts, be sure proper application techniques are used to provide adequate coverage for optimum sunburn suppression. Apply Raynox Air with well calibrated equipment which provides a uniform spray pattern for thorough coverage. A minimum of 17.5 gallons of diluted spray per acre is recommended for optimum performance. Failure to obtain adequate coverage on the fruit reduces the effectiveness of the product. Regardless of spray volume used, be sure to apply a minimum of **2.5 gallons** *Raynox Air* per acre of trees. Do not apply under windy and/or hot conditions. High speed winds induce drift and also disrupt spray patterns causing inconsistent coverage.

CONTINUED

High temperatures and dry conditions induce droplet evaporation and may induce marking of fruit from aerial application. Aerial applications when air temperature at the time of application is above 85°F or when maximum daily temperatures are expected to exceed 100°F are not recommended. Early morning applications, when temperature and wind speed are the lowest, are highly recommended. For more information regarding aerial applications of *Raynox Air*, consult your Valent representative.

When to apply: Apple fruit surface area expands very rapidly between 7 and 9 weeks after full bloom (WAFB). Most effective sunburn protection requires the first application at 7 WAFB with a second application 7 to 10 days later. The third application should be made 3 weeks later (i.e. 11 to 12 WAFB), and a fourth application should be applied 4 weeks later (i.e. 15 to 16 WAFB) on all but a few early maturing cultivars (e.g. Gala). Apples are most vulnerable to sunburn on clear, calm days with air temperatures that are generally above 85°F and with low humidity.

Evaporative Cooling/ Overhead irrigation: Raynox Air dries in 1 hour in most orchards. Use the same rates and timing of applications as described above. However, due to variability in humidity, canopy, and other environmental conditions, fruit treated with Raynox Air should be checked for dryness before making any additional spray applications or turning on evaporative cooling or irrigation systems.

CLEAN-UP: Clean sprayer tank and nozzles immediately after use by adding clean water to the spray tank and spraying the water through the nozzles. If any product has dried on the sprayer, it may be necessary to clean with hot water and detergent.

REMOVAL OF RAYNOX RESIDUES FROM FRUIT:

Apple packing-line bed brushes may sufficiently remove *Raynox Air* residues from fruit. However, use of a mild detergent on the brush beds will aid in removing *Raynox Air* residues.

3.0 STORAGE AND HANDLING

STORAGE: Store in a cool, dry place between 45°F and 90°F, and away from direct sunlight. Keep out of reach of children and livestock.

SPILLS: Only trained personnel equipped with proper protective gear should be permitted in the area. Stop spill at source. Reclaim material if possible for reuse. Containerize contaminated material for disposal. After all visible traces have been removed, flush area thoroughly with water.

PRODUCT & WASTE DISPOSAL: Dispose of contents /container should be made in accordance with applicable regional, national and local, laws and regulations.

4.0 WARRANTY AND DISCLAIMER STATEMENT

To the extent consistent with applicable law, seller makes no warranty, express or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. To the extent consistent with applicable law, user assumes all risks of use, storage or handling not in strict accordance with accompanying directions.
