

Raynox[®] ORGANIC

SUNBURN PROTECTANT

Raynox[®] ORGANIC Sunburn Protectant is designed to protect organically grown apples from sunburn browning. Under comparable environmental conditions, apple varieties vary in susceptibility to sunburn browning. For example, Cameo apples are highly susceptible to sunburn while Pink Lady apples are very tolerant. Other varieties, including Golden Delicious, Fuji, Granny Smith, Gala, Jonagold, Red Delicious and Braeburn, are intermediate in susceptibility.

PRINCIPAL INGREDIENTS: Organic clove oil and proprietary food grade ingredients..

WARNING

KEEP OUT OF REACH OF CHILDREN

May cause an allergic skin reaction. Eye contact will cause minor irritation. Individuals sensitive to alkaline materials may develop dermatitis upon prolonged or repeated contact with product concentrate. Avoid breathing mist spray or vapor if residuals are present at or above the TLV, respiratory protection must be worn. Wear additional protective clothing as necessary to minimize contact with product.

FIRST AID

If in Eyes:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Get medical advice/attention.
If on Skin:	<ul style="list-style-type: none"> • Wash exposed areas thoroughly with soap and water. • Remove contaminated clothing and launder before reuse. If skin feels slippery, continue washing until slick feeling is gone. • Contact a physician if irritation persists.
If Swallowed:	<ul style="list-style-type: none"> • Give large quantities of water. DO NOT induce vomiting. If vomiting occurs administer additional fluids. • Contact a physician for further directions. • Never give anything by mouth to an unconscious person.
If Inhaled:	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth, if possible.

CALL 800-892-0099 (24 HOURS) FOR EMERGENCY INFORMATION.

AGITATE OR MIX THOROUGHLY BEFORE USE. USE ENTIRE CONTENTS OF CONTAINER IMMEDIATELY AFTER OPENING. DO NOT STORE AT TEMPERATURES BELOW 45°F OR IN DIRECT SUNLIGHT. RECOMMENDATIONS FOR USE

TANK MIXES: DO NOT mix Raynox ORGANIC Sunburn Protectant with fertilizers, pesticides or other agricultural chemicals. DO NOT USE RAYNOX Water Softener with Raynox ORGANIC.

EVAPORATIVE COOLING / OVERHEAD IRRIGATION: Raynox ORGANIC is not recommended for use with evaporative cooling or overhead irrigation.

Mixing:

1. Fill clean spray tank with **ALL REQUIRED DILUTION WATER.**
2. Mix contents of tank while slowly adding **3 gallons of Raynox ORGANIC** to water for each acre. You may dilute **3 gallons of Raynox ORGANIC in 47 gal. water (1:20 ratio)** or **3 gallons of Raynox ORGANIC in up to 97 gal. water (1:40 ratio)** depending on the desired spray volume to be applied per acre with your sprayer (see details below).

APPLICATIONS: Ground Application - Apply 50 to 100 gal./acre (gpa) finished spray by airblast or boom sprayer to the trees. **Raynox ORGANIC** can be applied at either 100 gpa to both sides of the rows, or at 50 gpa to only the side exposed to afternoon sun. Spraying at 50 gpa on only the side exposed to afternoon sun will provide better sunburn protection. Regardless of the spray volume used (50 gpa or 100 gpa), be sure to apply **3 gallons of Raynox ORGANIC per acre** of trees. If your sprayer is calibrated to deliver 100 gpa when you spray both sides of each row, **dilute 3 gal. of Raynox ORGANIC in 97 gal. water.** To spray only the side of row exposed to afternoon sun, use the same sprayer calibration, but **dilute 3 gal of Raynox ORGANIC in 47 gal. water.** Shut off half the nozzles on the sprayer, and apply 50 gal of spray volume (containing **3 gals of Raynox ORGANIC**) on the side of row exposed to afternoon sun. For best coverage, ground speed of sprayer should not exceed 2 MPH. Air temperature during application should not exceed 85°F. After opening this container, product should be used within the same growing season.

When to apply:

Apple fruit surface area expands very rapidly between 7 and 9 weeks after full bloom (WAFB). Most effective sunburn protection requires the first application at 7 WAFB with a second application 7 to 10 days later. The third application should be made 3 weeks later (i.e. 11 to 12 WAFB), and a fourth application should be applied 4 weeks later (i.e. 15 to 16 WAFB) on all but a few early maturing cultivars (e.g. Gala). Apples are most vulnerable to sunburn on clear, calm days with air temperatures that are generally above 85°F and with low humidity.

CLEAN-UP: Clean sprayer tank and nozzles immediately after use by adding clean water to the spray tank and spraying the water through the nozzles. If any product has dried on the sprayer, it may be necessary to clean with hot water and detergent.

REMOVAL OF RAYNOX RESIDUES FROM FRUIT

Apple packing-line bed brushes may sufficiently remove Raynox residues from fruit. However, use of a mild detergent on the brush beds will aid in removing Raynox residues.

STORAGE & HANDLING

STORAGE: Store in a cool, dry place between 45°F and 90°F, and away from direct sunlight. Keep out of reach of children and livestock. Keep container tightly closed. Opened containers are not recommended for use the following growing season. Store away from incompatibles.

SPILLS: Only trained personnel equipped with proper protective gear should be permitted in the area. Stop spill at source. Reclaim material if possible for reuse. Containerize contaminated material for disposal. After all visible traces have been removed, flush area thoroughly with water.

PRODUCT & WASTE DISPOSAL: Dispose of contents / container should be made in accordance with applicable regional, national, and local laws and regulations.

WARRANTY AND DISCLAIMER STATEMENT

To the extent consistent with applicable law, seller makes no warranty, express or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. To the extent consistent with applicable law, user assumes all risks of use, storage or handling not in strict accordance with accompanying directions.
