## Fertilizer Micro-Nutrient for Fruits, Nuts, Vegetables, Field Crops, Turf and Ornamentals

### GENERAL INFORMATION

Reverb is a liquid soil & foliar applied nutrient, formulated to resolve nutrient deficiencies in all crops and turf & ornamentals. Reverb can be used in drip irrigation and as a foliar application. Reverb is intended to supplement established fertility programs and is a readily available source of manganese.

### TANK MIX COMPATABILITY

Reverb is compatible with most NPK fertilizers regardless of pH. Also, it is compatible with most fertilizers that contain major, secondary, and micro nutrients. However, a standard jar test is always recommended before tank mixing.

- Prior to applying Reverb in a tank mix with other agrochemicals or fertilizers, it is recommended to test the mixture on a small area before applying to the entire crop
- When tank mixed with other agricultural products, follow all label directions.

### DIRECTIONS FOR USE

CROP	APP INSTRUCTIONS	RATE/APPLICATION
<b>ALL CROPS –</b> In-Furrow/Pop-Up	Mix with pop-up and in-furrow fertilizers that are applied directly onto the seed or in seed row.	Apply 32-64 fl oz/acre with each nutrient application
<b>ALL CROPS/TREES –</b> Banded / Side Dress	Mix with banded, side dressed, dribbled, strip tilled applied fertilizers.	Apply 32-64 fl oz/acre with each nutrient application
<b>ALL CROPS/TREES –</b> Broadcast Liquid	Mix with broadcast liquid fertilizers. Can be tank mixed with chemical applications and suspension fertilizer mixes.	Apply 32-64 fl oz/acre with each nutrient application
<b>ALL CROPS/TREES –</b> Water Run	Mix with water run, controlled irrigation, & pivot applied liquid fertilizers. For higher rates of fertilizer per acre (>50gpa) apply the higher rate of Reverb.	Apply 32-64 fl oz/acre with each nutrient application
<b>TURF – SOD</b>	Mix with all foliar fertilizer applications.	Apply 4.0 TSP / 25 gals nutrient solution applied
