

**Modified Vegetable Oil Concentrate**

**PRINCIPAL FUNCTIONING AGENTS:**

Methylated vegetable oil, polyether modified polysiloxane, alkylphenol ethoxylate..... 100%

Contains organosilicone surfactant.

All ingredients are exempt from the requirements of a tolerance in 40 CFR 180.

**STOP-- READ LABEL BEFORE USING.**

**KEEP OUT OF REACH OF CHILDREN**

**WARNING**

**PRECAUTIONARY STATEMENTS**

Harmful if swallowed or absorbed through the skin. Causes substantial but temporary eye injury. Avoid contact with skin, eyes or clothing. Wear protective eyewear (goggles or face shield) and chemical-resistant gloves when mixing or handling concentrate. Wash thoroughly with soap and water after handling.

**FIRST AID**

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**STORAGE AND DISPOSAL**

**Storage**

Do not store near food or feed or near heat or open flame. Store in original container in a dry location.

**Container Disposal**

Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org). Decontaminated containers may also be disposed of in a sanitary landfill.

## GENERAL INFORMATION

RIVET is a uniquely formulated spray adjuvant developed to enhance the consistency or performance of certain postemergence herbicides. The unique blend of methylated seed oil and a superior non-ionic wetting agent promotes fast spreading, uniform distribution and absorption of spray on leaf and stem surfaces, thereby reducing the negative effects of adverse environmental conditions.

RIVET is also recommended for use with non-selective herbicides and other pesticides including those used to desiccate or defoliate.

Optimum application and consequent effects can be influenced by many factors. It is recommended that the spray layer be observed and adjuvant rates be adjusted accordingly.

If a pesticide label does not recommend tank-mixing with a non-ionic or methylated oil adjuvant, but does not prohibit such mixing, the user should either have experience with the pesticide/RIVET combination on each crop to be treated, or should first conduct a phytotoxicity test under environmental conditions similar to those at application.

## DIRECTIONS FOR USE For Terrestrial Use Only – Not For Aquatic Use

**Ground Application:** Add RIVET to the spray mixture at a rate of 3-6 pints per 100 gallons of spray mixture. The higher rate may be required on hard-to-control weeds or weeds under stress. Include liquid fertilizer (UAN) or ammonium sulfate at rates specified if so indicated on the pesticide label.

Always refer to the pesticide label for recommendations and precautions. Do not exceed adjuvant rates specified on pesticide labels.

**Aerial or CDA Application:** Add RIVET to the spray mixture at a rate of 6-16 pints per 100 gallons of spray mixture. The higher rate may be required on hard-to-control weeds or weeds under stress. Include liquid fertilizer (UAN) or ammonium sulfate at rates specified if so indicated on the pesticide label. When applying aerially or via CDA equipment, follow pesticide label directions including minimum water volume per acre. Do not substitute RIVET for water required by the pesticide label.

## MIXING

Fill spray tank one-half full with water and begin agitation. Add pesticides and/or fertilizers as directed by labeling or in the following sequence:

1. Dry flowables
2. Wettable powders
3. Flowables
4. Water soluble pesticides
5. Emulsifiable concentrates
6. Continue filling with agitation. Add RIVET last and continue agitation.

### Notice of Warranty

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
