GENERAL INFORMATION

RNA EASY DRIP is a multi-purpose drip line and emitter cleaner. When used at recommended rates, RNA EASY DRIP inhibits precipitation of a variety of inorganic salts from supersaturated solutions, retards or prevents crystal growth, sequesters divalent metals such as magnesium or calcium, and inhibits scale. RNA EASY DRIP may be applied alone or with fertilizers.

DIRECTIONS FOR USE

Apply at a rate of 1 to 4 ppm in irrigation water depending upon the quality of water and condition of drip line. Use 1 to 2 ppm for maintenance with good quality water. Use the higher rate of 3 to 4 ppm when applied with fertilizer or some scale removal is required. Under rare circumstances a rate of 5 to 15 ppm may be required for severe scale buildup. Replace emitters that continue to stay plugged after the first treatment. Use the high rates until drip lines are free of scale. Continue treatment at a maintenance level of 1 to 2 ppm. One part per million (1 ppm) equals 2.3 fluid pounds or 37 fluid ounces per acre-foot of water.

COMPATIBILITY

RNA EASY DRIP is compatible with most fertilizers. To avoid contact with RNA EASY DRIP from splash, when mixing with fertilizers, always add this product to fertilizer. Always jar test for compatibility before mixing with fertilizer or other material. Do not mix with chlorine or alkaline products, such as potassium carbonate. Do not use with calcium products such as calcium nitrate, gypsum, calcium carbonate or lime.

STORAGE AND DISPOSAL

STORAGE: Store in original container only and keep tightly sealed. Store in closed storage area.

PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations. Wastes resulting from the use of this product may be disposed of at an approved waste disposal facility.

CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent). Then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Recycling cleaned containers is the best option of container disposal. The ACRC (Agricultural Container Recycling Council) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
