GENERAL INFORMATION

RNA NUTRIENT SPRAY 0-16-9 is designed primarily for foliar applications to prevent or correct zinc deficiencies and supplement phosphorus in a wide range of agronomic and ornamental plants. DIRECTIONS FOR USE

Applications of foliar nutrients to leafy vegetables or soft-skinned fruit during periods of excessive temperatures may cause cosmetic injury. Applications of certain micronutrients to fleshy fruit within 30 days of harvest may result in staining of rind or skin.

COMPATIBILITY

RNA NUTRIENT SPRAY 0-16-9 is compatible with most pesticides. RNA NUTRIENT SPRAYS are not compatible with phenoxy-type herbicides, high pH products such as lime, and metals such as copper oxychloride, basic zinc and manganese sulfates, and metal sulfates. RNA NUTRIENT SPRAYS may increase the solubility of metals causing phytotoxicity to the plant.

Phenoxy-type herbicides may precipitate out of solution when mixed with RNA NUTRIENT SPRAYS. RNA NUTRIENT SPRAYS have a low pH; do not use at rates that lower the pH of the spray solution below 5 or crop damage may occur. Always jar test new combinations for compatibility prior to field mixing.
