

SIZER®

4-20-22 UREA AND DI POTASSIUM
POLY PHOSPHATE COMBINATION

SIZER® 4-20-22 is an effective combination of Low Biuret Urea and Di Potassium Poly Phosphate. **SIZER®** is a nutrient supplement product for a wide variety of blooming crops, including fruit, vegetable, ornamental, turf and field crops for foliar, soil application, and fertigation. **SIZER®** can also be used as a starter fertilizer at planting, placed 2 inches below and to the side of the seed, or as a horticultural drench.

Application Recommendations:

SIZER® 4-20-22 can be applied as a foliar spray with ground sprayers or applicators, or with aerial application equipment. **SIZER®** may possibly be combined with other agricultural chemicals, including other liquid plant nutrients and pesticides for application efficiency, but a small jar compatibility test should first be made before making commercial applications to the crop. A small portion of the crop should then be treated first in order to determine any phytotoxic effect. PFS recommends the use of a "spreader" only type surfactant. Use caution when using a "penetrant" or "sticker-type" surfactant.

Recommended Application Rates:

Grapes and Berries: Apply for essential phosphorous and potassium in early cool season spring, from bud break through post-bloom to veraison. Use for table, wine and raisin grapes as well as berries at 1-2 gallons per acre every 3-6 weeks.

Tree Fruit and Nut Crops: For deciduous and non-deciduous fruit and nuts, apply 2 quarts to 2 gallons per acre of **SIZER®** starting at shoot or flush growth, every 3-6 weeks.

Vegetable Crops: For tomatoes, peppers, lettuce, spinach, leaf, cole crops, cucurbits, beans, peas, potatoes, root, bulb or tuber crops, apply 1/2-2 gallons of **SIZER®** per acre, 30 days after planting, pre-bloom through fruit set every 5-7 days or as required, with the last application 1-2 weeks prior to harvest. To extend harvest, continue applications after first picking.

Ornamental Crops: For blooming ornamentals, apply 0.5-1.0 pints of **SIZER®** per 1,000 square feet of growing area 30 days after planting, and pre-bloom through flower maturity every 5-7 days or as required, with the last application 3-4 weeks prior to harvest.

Turf: Apply 2-4 gallons per acre of turf or sod production every 30 days, or as required for active growth.

Guaranteed Analysis:

Total Nitrogen (N).....	4.00%
4.00% Urea Nitrogen	
Available Phosphoric Acid (P ₂ O ₅).....	20.00%
20.00% Total Phosphoric Acid (P ₂ O ₅)	
Soluble Potash (K ₂ O)	22.00%

Derived From:

Urea, Di Potassium Poly Phosphate

Specifications:

Weight Per Gallon	12.20 lbs. @ 68° F.
P ₂ O ₅ Per Gallon	2.44
K ₂ O Per Gallon	2.68
pH	7.5-8.3
Salting Out Temperature F	<32

SIZER'S® unique manufacturing process and molecule are protected by the following patents:

Reactor: 4724132

Application Volume:

Air:
Finished spray must contain at least 65% water.

Low-volume ground:
Finished spray must contain at least 65% water.

Standard ground:
Finished spray must contain at least 50 GPA of water.

Dilute / Hand spray:
1-2 gal/100 gal water (spray to point-of-drip).

Information regarding the contents and levels of metals in this product is available by calling (800) 343-7775.

NET CONTENTS:

- 2.5 gal (9.464 L)
- 5 gal (18.927 L)
- 30 gal (113.562 L)
- 55 gal (208.198 L)

CAUTION - KEEP OUT OF REACH OF CHILDREN

May cause skin irritation. Avoid contact with eyes, skin or clothing. If exposure occurs, wash exposed area thoroughly with excessive water
