

AMMONIUM SULFATE-WATER CONDITIONER

General Information

SOIL BOOST PLUS® is the easy-to-use, cost-effective alternative to ammonium sulfate (AMS), which ensures pesticides such as glyphosate perform as intended. It contains some AMS and also an ester to lower the pH of your water to about 5.0. Adding just one pint per acre controls the pH, eliminating the need for a pH tester. SOIL BOOST PLUS also contains proprietary buffering, penetration, and translocation agents to significantly boost the penetration and movement of most pesticides in the target plants.

Active Ingredient

Ammonium Sulfate-Water Conditioner	7%
Proprietary Blend of Complex Components	10%

Guaranteed Analysis

Active Ingredient	17%
Inert Ingredients	83%
Total	100%

PROVIDES 0.6 lb. AMS PER GALLON
Net Weight per Gallon: 9.18 lb.

Directions for Use

Shake or agitate products well before using. Always use SOIL BOOST PLUS in accordance with the instructions concerning additives found on the herbicide label.

Normal rate is 1¼ gallons of SOIL BOOST PLUS per 100 gallons of spray solution. Under extremely hard water conditions (exceeding 25 grains of hardness) additional SOIL BOOST PLUS may be required.

Mixing Directions

Always mix SOIL BOOST PLUS in accordance with the instructions concerning adjuvants found on herbicide label. In the absence of specific mixing instructions, fill the spray tank ½ to ¾ full with clean water. While the water is agitating, add the ingredients in the following order:

1. SOIL BOOST PLUS
2. SOIL Service Landoil®
3. Wettable powders (suggest water slurry)
4. Flowables
5. Water soluble herbicides
6. Emulsified concentrates
7. Finish adding water to final volume
