

StrikeLock™

**Blend of Methylated Seed Oils, Surfactants, Deposition Aids and Drift
Control Agents**

LIQUID

Commercial

ACTIVE INGREDIENTS:

Surfactant Blend.....	100.0%
Warning, contains the allergen soy	

**SHAKE WELL BEFORE USING
READ THE LABEL BEFORE USING**

KEEP OUT OF REACH OF CHILDREN

CAUTION

Registration No. 34946 PEST CONTROL PRODUCT ACT

Net Content: 1- 1000 L, bulk

Manufactured For:
Winfield Solutions, LLC
P.O. Box 64589
St. Paul, MN 55164-0589
Saskatoon, SK S7T-0J1

Imported By:
Winfield United Canada, ULC
101-302 Wellman Lane

1-888-975-4769

FIRST AID

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

For Chemical Emergency, Spill, Leak, Fire Exposure or Accident, Call: CHEMTREC 1-800-424-9300

PRECAUTIONS
KEEP OUT OF REACH OF CHILDREN

Wear a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes during mixing, loading, application, clean-up and repair. Gloves are not required during application within a closed cab or cockpit.

Restricted-entry interval(s): DO NOT enter or allow worker entry into treated areas during the restricted-entry interval(s) stated on the label of the pesticide applied in conjunction with STRIKELOCK.

Apply only to agricultural crops when the potential for drift to areas of human habitation and human activity, such as houses, cottages, schools and recreational areas, is minimal. Take into consideration wind speed, wind direction, temperature inversions, application equipment, and sprayer settings.

When tank-mixes are permitted, read and observe all label directions, including rates and restrictions for each product used in the tank-mix. Follow the more stringent label precautionary measures for mixing, loading and applying stated on both product labels.

STORAGE

STRIKELOCK should be stored above freezing. If product freezes, warm and agitate (recirculate) prior to using. Store in original container only and keep sealed. Store in closed storage areas. Store this product away from food and feed.

DISPOSAL

For information on disposal of unused, unwanted product, contact the manufacturer or the provincial/territorial regulatory agency. Contact the manufacturer and the provincial/territorial regulatory agency in case of a spill, and for clean-up of spills.

CONTAINER DISPOSAL:**For recyclable containers:**

Do not reuse this container for any purpose. This is a recyclable container, and is to be disposed of at a container collection site. Contact your local distributor/dealer or municipality for the location of the nearest collection site. Before taking the container to the collection site:

1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
2. Make the empty, rinsed container unsuitable for further use.

If there is no container collection site in your area, dispose of the container in accordance with provincial/territorial requirements.

GENERAL INFORMATION

STRIKELOCK is designed to maximize pesticide performance by improving deposition of the spray application onto the intended target. STRIKELOCK improves coverage and reduces drift and evaporation of listed herbicide products being applied by ground or air. STRIKELOCK does not negatively affect spray pattern like other drift control adjuvants even when using air assisted type nozzles. STRIKELOCK should be used in conjunction with proper spray equipment selection set-up and use including boom height, nozzle type, size and pressure. Along with good judgment and the proper selection and use of spray equipment, STRIKELOCK can help professional applicators ensure the maximum performance of listed herbicide products.

STRIKELOCK is also a methylated soy oil and surfactant-based spray adjuvant. STRIKELOCK maximizes the effectiveness of listed postemergence and foliar active herbicides.

DIRECTIONS FOR USE

The rate of STRIKELOCK is indicated for the control product spray mixtures or other uses listed below. Herbicide product spray mixtures, their preparation and uses are to be derived from the individual labels for the herbicide products.

APPLICATION RATES

Apply at a rate of 0.50% - 1% v/v (5 – 10 L STRIKELOCK/1000 L spray mixture). When applied as a tank-mix combination, read and observe all label directions, including rates, personal protective equipment, restrictions and precautions for each product used in the tank-mix.

Always use in accordance with the most restrictive label restrictions and precautions.

Control Product Spray Mixture	Amount of StrikeLock per Litre of Spray Mixture	Remarks
Antler 240 EC, Antler 360 Unpacked, Arrow 240 EC Herbicide, Arrow All In, Clethodim 240, Clethodim 360EC Herbicide	5 L/1000L (0.5% vol/vol)	Add StrikeLock as the last ingredient. Consult each product label for use information.
Cadillac 240 Unpacked, Cadillac One, Nufarm Signal Herbicide, Signal Herbicide		
Reflex Liquid Herbicide		
Crush'R 540, Stonewall 540		
Crestivo Herbicide		
Assure II Herbicide, Leopard, Marshall Unpacked, Yuma GL Liquid EC Herbicide		
Antler 240 EC + Interline Herbicide, Antler 240 EC + Justice, Antler 240 EC + Crush'R 540, Antler 240 EC + Stonewall 540, Antler 360 Unpacked + Crush'R 540, Antler		

360 Unpacked + Stonewall 540, Marshall Unpacked + Interline Herbicide, Marshall Unpacked + Justice, Marshall Unpacked + Crush'R 540, Marshall Unpacked + Stonewall 540		
Davai 80 SL, Python A, Python B	5 - 10L/1000L (0.5 – 1.0% vol/vol)	
Aim EC Herbicide		
Heat LQ		
Insight Liquid SC Herbicide	10L/1000L (1.0% vol/vol)	
Armezon Herbicide		

MAINTAIN AGITATION AT ALL TIMES UNTIL THE CONTENTS OF THE TANK ARE SPRAYED OUT.

Mixing: Add STRIKELOCK after herbicides or other adjuvants are added to the spray solution but prior to complete filling of the spray tank. Do not mix STRIKELOCK with other products in an induction system or container when all the products are undiluted. Once mixed in water, all the products are compatible in any mixing order.

For Direct Injection: STRIKELOCK can be applied through injection systems where STRIKELOCK is added to one of the system's chemical injection tanks. An in-line mixing chamber is recommended.

- Step 1 Add STRIKELOCK to the chemical injection tank.
- Step 2 Pump the correct amount of STRIKELOCK into the line.
- Step 3 Pump the proper amount of water, herbicide product, and other adjuvants into the line for mixing with STRIKELOCK and chemicals before going into the spray boom.

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.
