

TagTeam® LCO liquid

MultiAction® Legume Fertility
pea and lentil

pea and lentil

7010-710

Extended Label

MINIMUM GUARANTEED ANALYSIS

ACTIVE: 7.2×10^8 cfu *Penicillium bilaii* per gram
 2.0×10^9 *Rhizobium leguminosarum* viable cells per gram
 $1 \times 10^{-7}\%$ lipo-chitooligosaccharide

INERT: Water-based carrier

Shake well before using.

Application directions:

Commercial treater/on-farm

- Open the box. Add the active powder into the bladder with inoculant and agitate. Pour the premix in the bladder and extender into the mix tank and agitate.
- Apply to the seed as soon as possible and prepare only as much TagTeam LCO liquid as will be used that day.
- Apply at a rate of 5 fl oz/100 lb (148 ml/45.4 kg).
- Application with other seed treatments is possible, but may reduce the planting window. For up-to-date pesticide compatibility information, please call Monsanto Company at 1-877-775-8787.

Planter, drill, or air seeder

- Do not use the liquid additive (17.9 fl oz bottle).
- Apply at a rate of 4.2 fl oz/100 lb (126 ml/45.4kg).
- Allow seeds to mix so product is distributed evenly.

For best results

- Shake well before using to ensure an even suspension.
- Plant within 7 days when using additive.
- Open package only when ready to use.

Storage instructions

- Store in a cool place, between 39°F (4°C) and 54°F (12°C).
- Do not allow to freeze.
- Minimize temperature fluctuations.
- Store out of direct sunlight.
- Use before the expiration date.

The active ingredients in TagTeam LCO are *Penicillium bilaii* spores, *Rhizobium leguminosarum* viable cells, and lipo-chitooligosaccharide. If use of this product by individuals allergic to molds and/or fungi is unavoidable, absorption by eye or skin contact, inhalation, or ingestion must be prevented to minimize the chance of an allergic reaction. Wear standard protective clothing and equipment including gloves, safety glasses and a NIOSH-approved respirator. In case of contact with skin or eyes, immediately flush exposed areas with plenty of water. Get medical attention if irritation occurs.

Unused TagTeam LCO should be disposed of in accordance with applicable civil statutes.

TagTeam® LCO liquid

MultiAction® Legume Fertility
pea and lentil

How it Works

The active ingredients in TagTeam LCO liquid pea and lentil are the bacterium *Rhizobium leguminosarum*, the soil fungus *Penicillium bilaii*, and lipo-chitooligosaccharide (LCO). *Rhizobium leguminosarum* forms root nodules which convert, or fix, nitrogen in the air into forms the plant can use. *Penicillium bilaii* grows on plant roots and makes less-available residual soil phosphate available for crop use. The LCO molecule enhances the soil microbial environment to support the plant's nutritional availability, supporting the growth and yield potential of the crop.

Where to use for maximum benefit

Best nitrogen responses to TagTeam LCO occur in soils that are low in available forms of nitrogen and populations of *Rhizobium leguminosarum*.

For soils low to medium in available phosphate:

Use TagTeam LCO with the lower recommended P fertilizer rate from soil test results.

If you do not soil test, use with your normal P fertilizer rate.

For soils high to very high in available phosphate:

Replace the starter in-row P fertilizer application (15–20 lb P₂O₅/acre [16.8–22.4 kg P₂O₅/ha]) with TagTeam LCO.

Benefits of using TagTeam LCO may be limited on:

- Soils with high nitrogen levels or with high application rates of nitrogen fertilizer.
- Soils that have been heavily manured (likely to be high to very high in available phosphate).
- In soils that don't tie up phosphate, i.e., very sandy soils (greater than 85% sand) and soils that contain more than 14% organic matter.

Limited Warranty

The Seller warrants that this product contains a minimum number of *Penicillium bilaii* colony forming units, *Rhizobium leguminosarum* viable cells, and minimum concentration of lipo-chitooligosaccharide as specified on this label. The Seller makes no other warranty expressed or implied as to product viability or performance since product storage, use and growing conditions are beyond the Seller's control. Seller's guarantee is limited to the terms set out on the label and subject thereto. Buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition. If this product does not perform as warranted above, and to the extent consistent with applicable law, customer's sole remedy for breach of warranty shall be replacement of the product or refund of the purchase price paid, at the option of Monsanto Company.

EXCEPT AS PROVIDED ELSEWHERE IN WRITING CONTAINING AN EXPRESSED REFERENCE TO THIS WARRANTY AND LIMITATION OF DAMAGES, SELLER MAKES NO OTHER EXPRESSED OR IMPLIED WARRANTY OR GUARANTEE TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, INCLUDING ANY OTHER EXPRESSED OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO.
