**GENERAL INFORMATION**

TILL-IT® CONSTRUCT® 7-20-0 is a liquid phosphate fertilizer designed as a starter or pop-up fertilizer. This product may be applied below, to the side or in the seed furrow of most crops depending on local conditions and established agricultural practices. It contains humic acids which may aid in the uptake of micronutrients.

TILL-IT CONSTRUCT 7-20-0 should be used as part of a comprehensive Total Nutrition System® for optimizing soil/nutrient conditions for plant growth, development, yield and quality.

**DIRECTIONS FOR USE**

Moisture conditions and planting strategy are important considerations when using TILL-IT CONSTRUCT 7-20-0.

POP-UP APPLICATIONS: Apply 1-5 gallons per planted acre on seed as established by local agricultural practices. This product may be diluted with water for ease of calibration if needed. When applied in the seed furrow on dry soils, a post-plant irrigation within 24 hours is highly recommended. Direct application to the seed is discouraged in saline soils.

STARTER APPLICATIONS: Apply 2-10 gallons per acre as a band directly below the seed, or 10-20 gallons a minimum of 6 inches below the seed, or 10-20 gallons below and to the side of the seed line. It may also be applied as a surface spray band over the top or to the side of the seed prior to planting.

COMPATIBILITY: This product is not compatible with acid fertilizers. Compatibility with other products may vary. Always jar test new combinations for compatibility prior to field mixing. Do not mix with calcium fertilizers.

Consult with your local Wilbur-Ellis representative for further information.
