## GENERAL INFORMATION

TILL-IT® KOMPOUND™ is designed primarily for soil applications to prevent or correct potassium deficiencies in a wide range of agronomic and ornamental plants. Its use is suggested as a supplement to a regular, balanced fertilizer program to enhance yields and improve quality. Application of TILL-IT KOMPOUND is a means of obtaining a quick response to needed elements.

**TILL-IT KOMPOUND** should be used as part of a comprehensive Total Nutrition System® for optimizing soil/nutrient conditions for plant growth, development, yield and quality.

## DIRECTIONS FOR USE

**TILL-IT KOMPOUND** may be applied on all tree, vine, field, row or vegetable crops by ground or fertigation application. Timing of treatments should be based on crop nutrient demand, prevailing environmental conditions, plant tissue analysis data or other information that indicates a need for supplemental potassium and sulfur.

#### SOIL APPLICATION:

Apply 1-4 quarts per acre at planting or initiation. If blending with ammonium polyphosphate (APP), use at a minimum ratio of 1 part **TILL-IT KOMPOUND** to 4 parts APP. Before application close to the seed, consider the total salt index and soil type for the rate of fertilizer application.

Apply 0.5-5 gallons per acre on the soil or through fertigation. If blending with UAN, use at a minimum ratio of 1 part **TILL-IT KOMPOUND** to 10 parts UAN. Multiple applications can be beneficial.

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.html

#### COMPATIBILITY

**TILL-IT KOMPOUND** can be mixed with most co-applied nutrient sources including APP and UAN. Please consider the following mixing procedure and labeled ratios for superior compatibility.

Fill tank with 1/2 of the needed APP 10-34-0 or 11-37-0.

Start agitation/recirculation and add the prescribed amount of **TILL-IT KOMPOUND**; continue agitation/recirculation during filling and application. If using an induction system simply induct the **TILL-IT KOMPOUND** while filling your 10-34-0 or 11-37-0 tank. Add the remaining 10-34-0 or 11-37-0 and any other products allowing adequate time to insure complete mixing.

**CAUTION WHEN MIXING WITH UAN:** Always use a minimum mixing ratio of 1 part **TILL-IT KOMPOUND** to 10 parts UAN. When solutions are colder than 50 degrees, mix **TILL-IT KOMPOUND** with water at a minimum ratio of 1:1 before mixing with UAN.

Do not mix with low pH fertilizers or tank mixtures.

Always jar test new combinations for compatibility prior to field mixing.
