GENERAL INFORMATION

TILL-IT® PRIMO-K is specially formulated and concentrated, designed to reduce soil tie-up and provide optimal potassium availability to the plant roots. **TILL-IT PRIMO-K** may be applied via surface spray banding prior to irrigation or rainfall event, subsurface injection, metering into sprinkler, micro-sprinkler, drip or other water conveyance systems, or directly into flood or furrow irrigation waters. **TILL-IT PRIMO-K** is non-acidic and non-corrosive to application equipment and irrigation systems. It will not plug or foul filters or emitters in micro-irrigation systems.

TILL-IT products are made specifically for use as soil-applied fertilizers. **TILL-IT** products should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development, yield and quality. Consult your **WILBUR-ELLIS** representative for advice on selecting treatments from this label to best fit local conditions.

DIRECTIONS FOR USE

TILL-IT PRIMO-K may be applied to all crops and growth stages as desired. Rates of application depend upon the severity of the deficiency, climate, soil condition, and method of application. Generalized use suggestions include consideration of the following:

- Applications prior to and during periods of root-flush activity may enhance uptake and responsiveness.
- Crop potassium requirements typically increase prior to crop biomass accumulation. Therefore, use of **TILL-IT PRIMO-K** is advised prior to and during periods of biomass or fruit bulking.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

- Banded applications or injection into irrigation water (i.e., fertigation) may be favored over broadcast applications.
- **DO NOT USE TILL-IT PRIMO-K** as a foliar treatment.
- Typical use rates are up to 20 gallons per acre per application.
- Sequential applications at lower rates are generally favorable over a one-time high-dose application.

COMPATIBILITY

TILL-IT PRIMO-K is compatible with most liquid and suspension fertilizers when used at standard field rates. **TILL-IT PRIMO-K** is also compatible with herbicides and most agricultural products that may be utilized in combination with liquid fertilizers.

TILL-IT PRIMO-K is not compatible with acid fertilizers or calcium. Always read the pesticide label for details and restrictions. Always jar test new combinations for compatibility prior to field mixing.
